## SPECIAL NOTE

Before an amendment to the Australian Constitution in 1967, it was provided by section 127 that ' in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted '. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration* (*Aboriginals*) 1967, came into operation on 10 August 1967.

The population estimates appearing in this publication for dates and periods from 30 June 1961 refer to total population, *i.e.* including Aborigines, except where otherwise indicated. Vital statistics, which until 31 December 1966 excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population. The term ' full-blood Aborigines ', as used in relation to these statistics, is to be understood to mean persons with more than one-half Aboriginal blood.

A line drawn across a column between the figures in Table 1 and various other tables throughout the publication, indicates a break in continuity in the series.

---

**Rounding of Figures.** Percentages appearing in tables in this publication have been rounded to the first (or second) place of decimals without making any adjustment which would be necessary to make the percentages so expressed add to precisely 100, or to the various sub-totals.

# PART I—POPULATION AND VITAL STATISTICS

The previous issue of Part 1 of the *Statistical Register of Western Australia* contains statistics up to 31 December 1965 together with preliminary data based on the Census of 30 June 1966. This issue brings the statistical series forward to 30 June 1968.

## SECTION 1—ESTIMATES OF POPULATION

### EXPLANATORY NOTES

For dates other than those of the periodic census of population, estimates are based on records of births and deaths and of movements of population interstate and overseas. Estimates of the population of Australia and of each of the States and Territories are prepared by the Commonwealth Statistician as at 31 March, 30 June, 30 September and 31 December in each year. Because the available records of interstate movement are incomplete, these intercensal estimates as they apply to States and Territories are approximate and are revised when the results of the next succeeding census become known.

Until 1967, when a new method was introduced, the estimates were made by adding to the census figures the subsequent natural increase (the excess of births over deaths) and all net recorded overseas movement according to State of embarkation or disembarkation, as well as all net recorded movement by air, rail, sea and bus between States. The 1966 Census results confirmed that, despite very considerable efforts made to improve records of interstate movements, it is not possible to measure such movements with the desired accuracy. The new method, tested over the 1961–1966 intercensal period, appears to provide a more accurate result, and has therefore been adopted for intercensal revision of the population and will continue to be used until the Census of 1971.

In the new method the population in each State or Territory is estimated by adding to the population ascertained at the Census the natural increase and the recorded net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures, supplemented by results of any special count or sample survey. Holiday, business or other similar short-term movements between States and Territories are omitted.

Population estimates for dates and periods between the Censuses of 30 June 1961 and 30 June 1966, in this publication, have been prepared using the new method and are adjusted in accordance with the final results of the 1966 Census.

**Mean Population.** As stated earlier, estimates of population are prepared as at the end of each quarter of the year. The mean population of a quarter might be taken to be the average, or arithmetic mean, of the populations at the beginning and the end of the quarter. If $a$ represents the population at the beginning of a year and $b$, $c$, $d$ and $e$ the populations at the end of the first, second, third and fourth quarters respectively, these quarterly means would then be $\frac{1}{2}(a + b)$ for the first quarter, $\frac{1}{2}(b + c)$ for the second, $\frac{1}{2}(c + d)$ for the third and $\frac{1}{2}(d + e)$ for the fourth quarter. The mean population for the year might then be taken as the arithmetic mean of the four quarterly average populations, or

$$\frac{1}{4}\left\{\frac{1}{2}(a + b) + \frac{1}{2}(b + c) + \frac{1}{2}(c + d) + \frac{1}{2}(d + e)\right\}$$

which may be more simply expressed as $\frac{1}{8}(a + 2b + 2c + 2d + e)$. This method of deriving mean population had been in use in Western Australia prior to its general adoption by the 1903 Conference of Australian Statisticians. It was later superseded by the more precise measure

$$\frac{1}{12}(a + 4b + 2c + 4d + e)$$

which is now commonly used in Australian statistics. In order to establish uniformity with current practice, estimates of mean population for 1901 and later years have been revised, where necessary by the application of this formula.

**Population Estimates, 1961 to 1967.** As a result of the repeal, with effect from 10 August 1967, of section 127 of the Australian Constitution, to which reference is made on page 2, current population estimates no longer exclude full-blood Aborigines. Estimates for earlier dates and periods back to the Census of 30 June 1961 have also been prepared on the basis of *total* population (*i.e.* including Aborigines) and are presented in the following tables (except for the years 1961 to 1966 in Table 5 relating to estimated age distribution). The final results of the 1966 Census, inclusive of all persons enumerated, have been taken into account in the preparation of these estimates.

A line drawn across a column of a table in this Section indicates a break in continuity in the series. Figures above the line exclude full-blood Aborigines; those below the line refer to total population, including Aborigines.

(*a*) Estimates for 1965 and earlier have been adjusted to conform to final census results ; those for later years are subject to revision after the 1971 Census. (*b*) Excess of births over deaths, including deaths of defence personnel, whether in Australia or overseas, between September 1939 and June 1947. (*c*) Interstate and overseas. (*d*) Minus sign (—) denotes decrease. (*e*) The rates represent total increase in population during the year expressed as a proportion per cent of the population at the end of the previous year. (*f*) At 31 December. (*g*) Not available.

# SECTION 2—OVERSEAS MIGRATION

## EXPLANATORY NOTES

The statistics of overseas arrivals and departures, as shown in this section, exclude passengers passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or ' through ' passengers), passengers on short pleasure cruises in the South-West Pacific commencing and finishing in Australia on ships not then engaged in regular voyages, and all air crew and ships'crew.

The classification into ' permanent ', ' long-term ' and ' short-term ' movement is based on information provided by the traveller on arrival in or departure from Australia. *These statements represent the traveller's intention at the time. Many travellers subsequently change their intentions and this must be borne in mind in interpreting the statistics.*

*Permanent movement* consists of persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. *Settlers* are persons who, on arrival in Australia, indicated that they came intending to settle. *Former settlers* are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more, and were now departing permanently.

*Long-term movement* consists of the arrival of visitors and the departure of residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more, and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

*Short-term movement* consists of all other arrivals and departures, including those of Australian troops irrespective of period of stay.

# SECTION 3—VITAL STATISTICS

## EXPLANATORY NOTES

Reference is made on page 2 to the repeal, with effect from 10 August 1967, of section 127 of the Australian Constitution. As a consequence of this repeal, all vital statistics, which previously excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population. These new statistics were first compiled in respect of the March quarter of 1967. Accordingly, all figures shown in this Section for the year 1967 include particulars of Aborigines, those for 1966 and earlier periods remaining on the old basis.

A line drawn across a column in the tables indicates a break in continuity in the series. Figures above the line exclude full-blood Aborigines; those below the line refer to events among the total population, including Aborigines.

**The Registration System.** Compulsory registration of births, deaths and marriages in Western Australia was originally provided for by legislation of the year 1841. The Statutes currently in force are the *Registration of Births, Deaths and Marriages Act, 1961–1965* (State) and the *Marriage Act* 1961–1966 (Commonwealth). For administrative purposes, the State is divided into twenty-seven Registry Districts, each having a District Registrar. Particulars of births, deaths and marriages reported to the District Registrars are sent to the Registrar-General at Perth, where a central registry office has been maintained since 1841.

Births are required to be registered within sixty days of the event, and must be notified by the father, the mother or the occupier of the premises where the birth took place. Stillbirths are registered both as a birth and a death.

Deaths are required to be registered within fourteen days. Notification must be given by the person who disposes of the body or by the occupier of the premises where the death occurred.

Marriages are celebrated according to the provisions of the *Marriage Act* 1961–1966 (Commonwealth) by ministers of religion registered under the Act, or by District Registrars. Ministers are required to lodge a marriage certificate with the District Registrar for registration within fourteen days of the celebration of a marriage.

**The Statistical Record.** Statistics of births, deaths and marriages are prepared from the registration documents. Data concerning births and deaths exclude particulars of stillbirths which are shown separately. The numbers of births, deaths and marriages registered are classified according to local government areas and Statistical Divisions. The figures, however, do not necessarily represent the number of such events which actually occurred in a particular local government area or Statistical Division during each year, since births are allocated to the usual place of residence of the mother, deaths to the usual place of residence of the deceased, and marriages to the usual place of residence of the bridegroom. The statistics are compiled according to date of registration and not date of occurrence.

| 1966 | 8·09 | 6·25 | 8·99 | 6·53 |

(*a*) Deaths per thousand of mean population. Excludes full-blood Aborigines. (*b*) Deaths per thousand of a standard population compiled by the International Statistical Institute, based upon the age and sex distribution of the population of nineteen European countries at their censuses nearest to the year 1900. The rate is computed by applying to each sex and age group in the standard population, the death rates actually recorded in the corresponding groups of the State and Australian populations. Figures exclude full-blood Aborigines.

## No. 38—Death Registrations, classified by Cause (*a*)

Statistics of cause of death in Australia from 1958 are classified according to the World Health Organization's International Classification of Diseases. Particulars relate to the underlying cause of death, which the World Health Organization has defined as the disease or injury which initiated the train of morbid events leading directly to death. Accidental and violent deaths are classified according to the external cause—that is, to the circumstances of the accident or violence which produced the fatal injury.

# SECTION 4—DIVORCE

## EXPLANATORY NOTES

This section contains statistics of dissolutions of marriage (commonly known as divorce), nullities of marriage and judicial separations.

The Commonwealth *Matrimonial Causes Act* 1959–1966 came into operation on 1 February 1961. The 1959 Act provided a uniform law throughout Australia with respect to divorce and other matrimonial causes, and superseded the Matrimonial Causes laws of the States and Territories except in so far as the transitional provisions of the Act kept them in force for the purpose of completing pending proceedings.

Under the *Matrimonial Causes Act* 1959–1966 a court may grant decrees of dissolution of marriage (commonly known as divorce), judicial separation, nullity of marriage and restitution of conjugal rights. Orders may be made for the custody and welfare of children, maintenance, the settlement of property, and damages for adultery.

The statistics in this section refer to petitions filed and final decrees granted for dissolution of marriage, nullity of marriage and judicial separation. Statistics of petitions filed relate only to the original petition in a suit, *i.e.* a cross-petition contained in an answer by the respondent is not taken as a separate petition, nor are the grounds cited in a cross-petition included.

# SECTION 5—POPULATION CENSUS

## EXPLANATORY NOTES

Population censuses prior to the Commonwealth Census of 1911 were undertaken by the Governments of the several Australian Colonies. In the Western Australian Census it was the practice to exclude full-blood Aborigines from the tabulations. At the 1911 Census and later enumerations full-blood Aborigines were excluded from the tabulations in accordance with the requirements of section 127 of the Australian Constitution which provided that ' in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted '. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration (Aboriginals)* 1967, came into operation on 10 August 1967.

With regard to the original provision, Commonwealth legal authorities were of the opinion that persons of the half-blood were not ' aboriginal natives ' within the meaning of the Constitution, and *a fortiori* that persons of less than half Aboriginal blood were not Aboriginal natives. Accordingly, only persons having Aboriginal blood to a degree greater than one-half have been excluded from the census tabulations.

## CENSUS, 30 JUNE 1966

**Delimitation of Urban Boundaries.** For the purpose of presenting statistics obtained at the Census of 30 June 1966, new methods have been used in the delimitation of metropolitan areas and certain other urban centres. Briefly, these are as follows :

(i) Around each capital city and each town with a population of 75,000 or more *two* boundaries have been drawn.

The *outer* boundary, which is fixed, circumscribes the area in close economic and social contact with the main city or town. These areas are designated Statistical Divisions (for State capital cities) or Statistical Districts (for Canberra and some other cities).

The *inner* boundary indicates the area within which, at the time of the census, there was a density of at least 500 persons per square mile. This density is determined for each Census collector's district (the smallest geographical area available). From census to census as urbanisation proceeds this *inner* boundary will move outwards to encompass peripheral development. Some specified areas of lower density (*e.g.* industrial areas) are classified as urban on other grounds.

(ii) The principal urban centre within each Capital City Statistical Division has been designated the ' Metropolitan Area'.

(iii) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile have been designated ' Urban Centres'.

In determining the outer boundary of each Capital City Statistical Division the aim has been to delimit, for at least two or three decades, the region expected to be in close contact with the inner urban area, after making allowances for further urban development, including satellite towns, improvements in transport, and other factors.

A detailed statement on the concepts and criteria adopted in the delimitation of metropolitan areas and other urban centres is contained in *Field Count Statement No. 4—Population : Principal Urban Centres of Australia* published November 1966 by the Commonwealth Statistician, Canberra.

**Statistical Divisions.** The Statistical Divisions (and their component local government areas) referred to in this publication are shown on a map contained in Part V of the *Statistical Register of Western Australia*, the *Abstract of Statistics of Local Government Areas* and the *Western Australian Year Book.*

The Perth Statistical Division was constituted with effect from 1 January 1966 and comprises the area formed by the amalgamation of the former Metropolitan and Swan Statistical Divisions. Data relating to the Perth Statistical Division for periods prior to 1966 are compiled by reference to statistics concerning the former Metropolitan and Swan Statistical Divisions.

**Local Government Areas.** In Western Australia local government areas are designated Cities, Towns or Shires. In Table 80 Cities are marked (C), Towns (T); all other local government areas shown are Shires. The names and designations used in Table 80 are those which were current at 30 June 1966. The only change during 1966–67 and 1967–68 occurred on 3 May 1968 when the designation of the Town of Melville was changed to the City of Melville.

A number of boundary changes, many of them minor, occurred between the Censuses of 1961 and 1966. In some cases, however, a boundary change resulted in a change in the population of the local government area. In order to eliminate population changes due to boundary changes and to provide a comparison with the 1966 population figures, the 1961 local government area populations shown in Tables 80 and 81 have been adjusted to the boundaries used in 1966.

In addition to boundary changes, some new Shires were constituted, some municipalities were amalgamated, and there were some changes of name. These are listed below.

The Town of North Fremantle was annexed to the City of Fremantle with effect from 1 November 1961.

Mosman Park, formerly a Shire, was declared to be a Town with effect from 26 January 1962.

The Shire of Coorow was constituted, with effect from 1 July 1962, by severance of territory from the Shires of Carnamah, Dalwallinu and Perenjori.

Melville, formerly a Shire, was declared to be a Town with effect from 28 September 1962.

The Shire of Exmouth was constituted, with effect from 1 January 1964, by severance of territory from the Shire of Gascoyne-Minilya.

The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from 1 March 1965.

The Town of York was amalgamated with the Shire of York, with effect from 15 March 1965, to form one local government area named the Shire of York.

The name of the Shire of Geraldton-Greenough was changed to the Shire of Greenough, with effect from 19 March 1965.

The name of the Shire of Trayning-Kununoppin-Yelbeni was changed to the Shire of Trayning, with effect from 10 September 1965.

**Census Collectors' Districts.** For the purpose of taking a Population Census, each local government area is subdivided (as appropriate) into areas known as collectors' districts. For the 1966 Census operations, the 144 local government areas (*i.e.* Cities, Towns and Shires) in Western Australia were divided into 1,394 Collectors' Districts, of which 727 were in the 27 municipalities comprising the Perth Statistical Division.

A Collector's District is an area which varies in size according to population density and physical characteristics and constitutes a suitable area for one collector to cover in the period allowed for the distribution and collection of Census schedules.

Statistics as presented in Tables 65 to 79 are also available for each Census collector's district, on request. The data may be interpreted by reference to maps showing collectors' districts contained in each local government area. These maps show the names of boundary streets, etc. of each collector's district which is designated by code number for reference to the appropriate statistical table. Large-scale Census maps of sectors of the Perth Statistical Division are available at a cost of $1 each ($7 per complete set of seven). Smaller maps (twenty-five to the set) can be supplied free of charge on request.

**Work Force.** The work force comprises all persons engaged in an industry, business, trade or service, and includes persons who were not working at the time of the Census. It includes employers, the self-employed (*i.e.* persons working on own account but not employing others), employees on wage or salary, and unpaid helpers (other than those usually working in such activities for less than fifteen hours per week).

The 1966 Census work force statistics are not strictly comparable with those of earlier censuses. For a detailed explanation of the new approach adopted at the 1966 Census, the reader is referred to *Census Bulletin No.* 5. 1—*Summary of Population : Western Australia*, issued November 1967 by the Commonwealth Statistician, Canberra. The net effect of the new definition is to include approximately 8,100 additional persons in the Western Australian work force, a proportional increase of approximately 2·4 per cent.

**Occupation.** Occupation is defined as the nature of the work which a person performs, and implies *personal* performance. It may be based on the material treated, the process carried out or the type of service rendered by an *individual* worker. Thus the occupation of a person is the kind of work that he or she personally performs, as distinct from industry, which is defined as any single *branch of productive activity, trade or service* and is not concerned with the nature of personal performance.

The Classification of Occupations used in the tabulation of the 1966 Census data has been adapted from and closely adheres to the principles embodied in the International Standard Classification of Occupations issued by the International Labour Office, Geneva, 1958.

The Australian Classification of Occupations contains 11 Major Groups, 72 Minor Groups and 313 Occupation Categories. In accordance with the International Standard Classification, occupations have been grouped by the general similarity of the characteristics of the work they entail. The data appearing in Table 74 are restricted to the 11 Major Groups and the 72 Minor Groups. Complete descriptions of Major Groups, Minor Groups and Categories, together with a list of occupations included under each heading, are contained in the *Classification and Classified List of Occupations—Revised : June 1966*, published by the Commonwealth Statistician, Canberra.

**Industry.** For statistical purposes, industry may be defined as any single branch of productive activity, trade or service. It is concerned with the activities of persons, firms or businesses considered as a group producing the same commodity, performing the same process or providing the same service. All persons engaged in any such branch of economic activity are classified industrially as belonging to that particular branch irrespective of their personal occupation within the industry. Examples are : Mining, which includes, in addition to miners and prospectors, such persons as laboratory technicians, transport workers and office staff employed by mining companies ; Shipping, which covers staff members of shipping companies and agencies, as well as ships' crews ; professional activities such as Medicine, Law and Architecture which include not only qualified practitioners but also persons employed by them as, for example, receptionists, law clerks and draftsmen.

Classification according to industry at the 1966 Census has been made on the basis of the *Classification and Classified List of Industries—Revised : June, 1966*, published by the Commonwealth Statistician, Canberra. The classification divides the work force into 14 Major Groups which, in turn, are divided into 53 Sub-groups and 342 Industry Categories.

It should be noted that the particulars shown under *Public Authority Activities* (*n.e.i.*) are residual figures comprising those persons in the administrative sphere of general government, local government and foreign consular services who have not been classified elsewhere. They do not, therefore, represent the total numbers of persons engaged in or attached to all fields of government service, Commonwealth, State or Local. For example, employees of the Railways Commission have been assigned, in accordance with evidence contained in their census schedules, to Railway workshops in the sub-group *Manufacture, Assembly and Repair of Ships, Vehicles, Parts and Accessories* ; to Motor bus services in the sub-group *Road Transport* ; to Construction and maintenance of permanent way in the sub-group *Construction Works and Maintenance* (*other than Buildings*) or to Rail services under *Rail and Air Transport*. Further examples of this allocation of government workers to industries other than *Public Authority Activities* (*n.e.i.*) are provided by Departments such as Education, Public Works, Postmaster-General's, Repatriation, and local government authorities.

## No. 81—Urban and Rural Populations : Censuses, 1961 and 1966

NOTE. For *Metropolitan* and other *Urban Centres* which are delineated by moving boundaries (see note *Delimitation of Urban Boundaries* on page 66), boundaries for 1961 have been redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with the 1966 population. The intercensal increase or decrease between 1961 and 1966 may therefore reflect population change within the original 1961 boundary ; urban growth beyond the original boundary ; or the merging of *Other Urban* areas with the *Metropolitan Area.*

**Rounding of Figures**—Many of the figures appearing in the tables have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

## No. 3—Consolidated Revenue Fund: Revenue and Expenditure classified according to Function

NOTE—This table is designed to show (in respect of the Consolidated Revenue Fund only) the gross and net cost of each function of Government irrespective of the Department or Departments administering these functions. In cases where an activity is such that it involves more than one function, each of its components has been included in that function which is considered to be the most appropriate. For example, in classifying expenditure attributable to child welfare, the custody and care of delinquent children is included under " Law, Order and Public Safety " and the education of children in institutions under " Education ", only the balance being assigned to the item " Welfare ".

Certain functions are performed by semi-government authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, *e.g.*, Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits from public enterprises. Public Debt Charges are shown as a separate function.

## No. 12—Receipts and Expenditure of State Road Funds (Combined Funds)

NOTE—Road funds are dealt with in a number of accounts comprising the Central Road Trust Fund, Main Roads Trust Account, Railway Crossing Protection Fund Account (which replaces The Metropolitan Area Railway Crossing Fund Account as from 1 January 1967), Strategic Roads and Roads of Access to Commonwealth Property Account, and Beef Cattle Roads Account. all controlled by the Commissioner of Main Roads ; the Metropolitan Traffic Trust Account administered by the Commissioner of Police ; and the Roads Maintenance Trust Fund administered by the Commissioner of Transport.

Money raised by local government authorities on their own behalf, and their expenditure on roads or facilities for roads, are not included in the table below.

Amounts for certain items of receipts shown in the table differ from similar Trust Fund totals in the preceding table (see page 14) because the figures are compiled on a different accounting basis. For example, in the following table, net transactions are shown whereas in the preceding table the flow of funds is recorded on a "gross" basis.

## No. 15—Summary of Commonwealth Government Net Taxation Collections in Western Australia

NOTE—The figures in this table represent the amounts collected in Western Australia but do not necessarily indicate the amount contributed by the people of the State, as moneys may be collected in one State in respect of goods consumed in, or assessments made on account of, other States. Further, administrative arrangements for the collection of certain taxes are such that a large proportion of the revenue (or, as in the case of Wheat Tax, the whole of the revenue) is brought to account in a State other than Western Australia.

## SECTION 5—TAXATION

### No. 16—State Taxation : Net Collections

NOTE—Collections are grouped according to the nature of the tax rather than the method of collection. Thus stamp duties on betting tickets and revenue from bookmakers' licences and totalisator licences are included under the heading " Racing " and not under " Stamp Duties " or "Licences".

The figures shown comprise payments to Consolidated Revenue and trust or special accounts. They include earnings from some types of licences which are treated as departmental revenue, and not as taxation, in the Public Accounts. For purposes of comparison with other States, vehicle registration fees and passenger and carriers' licence fees collected by local government authorities outside the Metropolitan Traffic Area are also included. At the foot of the table there appears a reconciliation between the aggregate net collections for the year 1966-67 and the total of the item " Taxation " in Table 1.

# ANALYSIS OF ASSESSMENTS UNDER THE COMMONWEALTH INCOME TAX AND SOCIAL SERVICES CONTRIBUTION ASSESSMENT ACTS

NOTE—Tables 19 to 22 inclusive have been compiled from information supplied in returns made to the Commissioner of Taxation. The information relates to assessments issued during a period of fifteen months, in the case of individuals, and eighteen months in the case of companies, after the close of the year of income.

The term " Central Office" appearing in some of the tables refers to the central office of the Taxation Department. Statistics of assessments issued by each State office and by the central office are compiled separately. Assessments issued by the Western Australian office cover taxpayers who derive income only in Western Australia, while those issued by the central office cover taxpayers who derive income (other than salary and wages and dividends) in more than one State and taxpayers whose income is derived wholly from sources outside Australia. In Table 19, particulars of central office taxpayers resident in Western Australia have been included. Tables 21 and 22, which relate to companies, include only those assessed in Western Australia.

" Actual Income " may be defined briefly as " gross income (including exempt income) *less* expenses incurred in gaining that income." (" Exempt income " includes war and service pensions, social services benefits, income from gold mining and certain income derived from overseas if the income is taxed in the country in which it is derived.)

" Taxable Income " is equal to Actual Income *less* Exempt Income and Allowable Deductions, the more important of which are described in the *Western Australian Pocket Year Book* for 1967 and earlier.

## SECTION 6—LOCAL GOVERNMENT FINANCE

NOTE—For further details see Part XI of *Statistical Register of Western Australia.*

Prior to 1961–62, the financial year for Road Boards (now Shires) ended on 30 June, and for former Municipalities (now Cities or Towns) on 31 October. The Local Government Act of 1960, which came into operation on 1 July 1961, specifies a financial year ending on 30 June for Cities, Towns and Shires. For 1961–62 the financial statistics of former Municipalities are for the eight months from 1 November 1961 to 30 June 1962.

## SECTION 4—FIRE, MARINE AND GENERAL INSURANCE

NOTE—*The tables in this section have been compiled from returns submitted by insurers transacting business in Western Australia.*

*The returns do not relate to a uniform period, the actual period varying according to the financial year of individual insurers.*

*The statistics shown conform substantially to the following definitions and should be interpreted accordingly.*

(*i*) *Premiums represent the full amount receivable in respect of policies issued or renewed during the year, less returns, rebates and bonuses paid or credited to policy holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from " earned premium income " appropriate to the year. When figures are increasing, as in recent years, premiums receivable (as shown in the tables) are greater than " earned premium income " appropriate to the year. The converse applies when figures are declining.*

(*ii*) *Claims include provision for outstanding claims and represent claims or losses incurred during the year. Salvage and other amounts recoverable have been deducted.*

(*iii*) *Contributions to Fire Brigades, Commission, Agents' Charges and Expenses of Management represent mainly charges paid during the year.*

(*iv*) *Taxation represents mainly payments made during the year and includes Income Tax, Pay-roll Tax, Licence Fees, Stamp Duty (where paid by the company), etc. Income Tax paid during the year is based on the income of earlier years.*

*The tables contain selected items of statistics and the information shown is not suitable for the construction of a "Profit and Loss" statement or " Revenue Account ".*

# SECTION 1 — INTERSTATE AND OVERSEAS TRADE

## EXPLANATORY NOTES

**Year of Record.** In all tables, the particulars shown relate to the year ended 30 June.

**Sources of Statistics.** Overseas trade statistics are compiled from documents obtained under the *Customs Act* 1901–1968 and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. Particulars of Western Australia's overseas trade, as presented in this publication, have been prepared from data furnished by the Commonwealth Statistician, Canberra.

Statistics of Western Australia's trade with other Australian States are compiled by the Western Australian Office of the Bureau of Census and Statistics from information contained in documents collected under authority of the *Census and Statistics Act* 1905–1966 from importers, exporters, and other persons concerned with the distribution of goods.

**Classification of Commodities.** Overseas trade statistics for years up to and including 1964–65 were compiled according to a Statistical Classification of Imports and Exports which, in 1964–65, contained approximately 3,700 items of import and 1,300 items of export.

On 1 July 1965 a new Australian Customs Tariff was introduced. The nomenclature used in the Tariff is that of the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, an international agreement signed at Brussels on 15 December 1950. The system of naming established by the Convention has come to be known as the ' Brussels Nomenclature '.

From 1 July 1965, imports into Australia have been classified according to an *Australian Import Commodity Classification* of some 5,000 items based on the *United Nations Standard International Trade Classification, Revised*, which closely follows the Brussels tariff nomenclature.

A new *Australian Export Commodity Classification* of some 2,000 items, also based on the Standard International Trade Classification, was introduced on 1 July 1966.

The Standard International Trade Classification consists of 10 broad commodity categories designated ' Sections ' and comprising 56 commodity ' Divisions ' which are further divided into 177 commodity ' Groups '. The structure of the classification serves to provide a summary of data relating to 1,312 basic items of international trade.

For the purpose of recording details of Western Australia's trade with other Australian States, a revised Interstate Trade Classification based on the new Australian Commodity Classifications has been prepared in the Western Australian Office of the Bureau. In compiling this document, the basic items of the Australian Classifications have been compressed or expanded, according to their significance in Western Australia's trade. The Interstate Trade Classification comprises some 860 items of import and 370 items of export within the structure of commodity Sections, Divisions and Groups referred to previously. The revised Interstate Trade Classification was first used in compiling details of Western Australia's trade with other Australian States in respect of the year 1965–66.

The commodity descriptions appearing in some of the tables which follow are, in some cases, abbreviations of the full text, which is available in the *Australian Import Commodity Classification* and the *Australian Export Commodity Classification.*

**Tables 7 and 8.** The numbering system used in Tables 7 and 8 comprises up to seven digits. The first digit denotes the Section, the first two digits the Division, and the first three digits the Group. These are the Sections, Divisions and Groups of the Standard International Trade Classification. The fourth and fifth digits serve to identify the statistical item in the Interstate Trade Classification. In the case of overseas trade, the seven digits which are used to denote the statistical item correspond to those used by the Commonwealth Statistician in the publication *Overseas Trade*, 1967–68 : *Bulletin No.* 65. For presentation in Tables 7 and 8 the detailed statistics contained in the bulletin have been condensed by combining some items of overseas trade under a single reference number. In some instances the sign † appears in place of the seventh digit, indicating that the particulars shown against that number refer to a combination of items which have reference numbers with common digits up to the sixth. Similarly, the sign †† appearing in place of the sixth and seventh digits indicates a combination of items having reference numbers with the first five digits in common. A dash (—) appearing in the Reference Number column indicates that the figures shown relate to a collection of heterogeneous items of overseas trade for which there is no appropriate single reference number (or group of numbers).

Where the value of imports from, or exports to, a country in 1967–68 was less than $1,000 for a particular item, the country is not listed separately, and the value concerned is included in the figures shown against ' Other '.

Although the information presented in Tables 7 and 8 is confined to the year 1967–68, comparable data for imports during 1965–66 and 1966–67 and exports during 1966–67 are available on request from records held in the Western Australian Office of the Bureau.

Detailed particulars of overseas imports and exports for each of the Australian States, and for Australia as a whole, are available in the bulletin *Overseas Trade*, published annually by the Commonwealth Statistician, Canberra.

**Tables 12 and 13.** The numbering system used in Tables 12 and 13 comprises up to five digits. The first digit denotes the Section, the first two digits the Division, and the first three digits the Group. These are the Sections, Divisions and Groups of the Standard International Trade Classification. The fourth and fifth digits serve to identify the statistical item in the Interstate Trade Classification. In some cases the sign † appears in place of the fifth digit, indicating that the particulars shown against that number refer to a combination of items which have reference numbers with common digits up to the fourth. Similarly, the sign †† appearing in place of the fourth and fifth digits indicates a combination of items having reference numbers with the first three digits in common. A dash (—) appearing in the Reference Number column indicates that the figures shown relate to a collection of heterogeneous items for which there is no appropriate single reference number (or group of numbers).

Additional information relating to Western Australia's trade with other Australian States appears in the mimeographed publication *Interstate Trade of Western Australia*, issued annually by the Western Australian Office of the Bureau.

In tabulating particulars of Western Australia's interstate trade, statistics relating to trade with the Australian Capital Territory are included with those of New South Wales.

**Index to Articles of Trade.** The index appearing in pages 8 to 17 is specifically designed to cover the detailed items contained in Tables 7 and 8 but the five digit interstate reference numbers shown against these items are in most cases applicable to like commodities appearing in Tables 12 and 13.

**Units of Quantity.** Quantities are generally, but not invariably, expressed in terms of the normal trade unit. Where *cental* is used, the unit is equivalent to 100 lb avoirdupois. *Gallon* refers to the imperial gallon of 277¼ cubic inches capacity.

Quantities are not given in cases where there is no appropriate common unit (for example, an item, or a Section such as Section 7—*Machinery and transport equipment*, which covers a number of disparate commodities and cannot be recorded under a uniform unit of quantity).

**Valuation of Items of Trade.** All values are recorded in Australian currency. The basis of valuation used, except in the case of imports from other Australian States, is *f.o.b.*, or its equivalent, at the port of shipment. Statistics of imports from other Australian States are recorded in terms of landed cost.

**Direction of Trade.** The term *Country of Origin*, as used in recording statistics of overseas trade, means the country of production ; *Country of Destination* means the country to which goods were consigned at the time of export. In compiling statistics of Western Australia's interstate imports and exports, goods are classified according to the State or Territory from which or to which they were consigned.

**Reimports.** Goods classified as reimports consist of articles exported from Australia and subsequently reimported into Western Australia. The country of origin, in these cases, is shown as *Australia (reimported)*.

**For Orders.** Where the country of destination is not determined at the time of consignment the goods are recorded as exported ' For Orders '.

**Geographic Trade Areas.** The geographic trade areas shown in the tables are based on the *Classification of Geographic Trade Areas for Shipping Statistics* used by the Commonwealth Statistician, Canberra in recording overseas shipping cargoes. Geographic trade areas, as detailed in Tables 2 and 3, comprise only those countries with which Western Australia engaged in trade during the three-year period ended 30 June 1968.

**Ships' Stores.** The term *Ships' Stores* comprises stores loaded on board ships and aircraft and includes bunker coal and oil. Export figures exclude the value of ships' stores, details of which are supplied separately in Table 9, page 156.

**Rounding of Figures.** Values have been rounded to thousands without making those adjustments which would be needed to make the rounded figures add to the rounded totals. It is for this reason that figures do not always add to the totals shown in the tables.

### Abbreviations and Symbols

'*n.e.i.*' denotes 'not elsewhere included'.

*China, Rep. of (Formosa)* refers to the Republic of China (Formosa).

*Germany, Fed. Rep. of* refers to the Federal Republic of Germany.

*South Arabia, Fed. of* refers to the Federated States of South Arabia.

*U.S.S.R.* refers to the Union of Soviet Socialist Republics.

The symbol .... in the *Quantity* column denotes 'nil' quantity or 'quantity not recorded'.

The symbol .. in the *Quantity* column indicates that the quantity recorded was less than half the unit of quantity shown.

(*a*) As a consequence of the introduction of a new Australian Export Commodity Classification on 1 July 1966, export figures for 1965–66 have not been shown, because it is not possible to present 1965–66 data for this table on a basis strictly comparable with that for later years. (*b*) The six countries selected represent those with the largest aggregates for the two years shown, with the exception of China (mainland) which, since it dealt mainly in one commodity (see Table 16), was not shown separately in this table. (*c*) Less than $500. (*d*) Includes an amount of $61·28 million, representing exports of wheat to China (mainland) valued at $46·10 million; and to Pakistan, $15·18 million. (*e*) Includes an amount of $61·55 million representing exports of wheat to China (mainland).

# SECTION 2 — TRANSPORT

## SHIPPING

**Sources of Statistics.** On arrival at, or departure from a port in Australia, whether from or for an overseas country or from or for another port in Australia, the master or agent must ' enter ' the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship and its cargo. At the end of each month the Department of Customs and Excise sends to the Commonwealth Bureau of Census and Statistics a return of information so obtained. Tables 23-8 and 30-5 have been prepared from tabulations compiled from these returns.

The information in Tables 29 and 36-9 has been obtained from data supplied by the Fremantle Port Authority ; the Albany Port Authority ; the Bunbury Port Authority ; the Harbour and Light Department ; and by private operators in respect of the ports at Yampi, Dampier and Exmouth and the buoyed sea terminal at Barrow Island.

Statistics of cargo handled obtained from these two sources are not strictly comparable for the reason mentioned under *Tonnage of Cargo* below.

**Classification of Vessels.** In Tables 23-6 and 30-1 vessels are classified to three groups : liner services ; tramps and bulkships ; and tankers.

A liner service specifically relates to a vessel which, on the voyage on which cargo is loaded or discharged at a Western Australian port, is operated by a common carrier in providing services on a specified route on a relatively regular basis. Liner services include both passenger and cargo liners. The term *tramp* refers to freight-vessels not operating on a regular route.

**Country of Loading or Discharge.** Ports at which vessels load or discharge cargo are allocated to their respective countries and these are the countries of loading or discharge of cargo shown in Tables 32-5. Each country is classified to a geographic trade area in accordance with the *Classification of Geographic Trade Areas for Shipping Statistics* used by the Commonwealth Statistician, Canberra.

The countries shown are not necessarily the countries of origin or ultimate destination of cargo because previous or subsequent overseas transhipments are not taken into account. The statistics of cargo classified according to the country in which it was loaded or discharged cannot therefore be compared directly with statistics of overseas trade classified by country of origin or destination. In Australian import statistics, *Country of Origin* refers to the country in which the goods imported were produced. In Australian export statistics, *Country of Destination* refers to the country of final destination of goods at the time of export and not to any country in which they may be transhipped en route. For example, where the United Kingdom is the country of final destination but the goods exported are transhipped at a Netherlands port, export statistics would show them as exports to the United Kingdom whereas in shipping cargo statistics they would be shown as cargo loaded for discharge in the Netherlands.

Cargo loaded for 'optional ports' (*i.e.* consignments of cargo for discharge at one of a specified range of ports, the particular port being nominated by the shipper during the voyage) is classified to the country in which the ports are situated when they are all within one country. If the range of port options extends beyond one country, the cargo is allocated to the category ' optional ports ' within the relevant geographic trade area.

In the case of a vessel without cargo (*i.e.* 'in ballast ') sailing to or from Australia (or between Australian ports) the country or port referred to is that in which the voyage commenced or terminated.

**Tonnage of Vessels.** The *gross tonnage* and *net tonnage* of a vessel are measures of its carrying capacity, one ton being equal to 100 cubic feet. The gross tonnage, as used in Tables 37-9, represents the total volume of a vessel's enclosed space. The net tonnage, as used in Tables 23–8, represents the volume of enclosed space that can be used for cargo and passengers.

**Tonnage of Cargo.** Most cargoes are recorded in terms of the *ton weight* of 2,240 lb, but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the *ton measurement*, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of ' tons weight ' or ' tons measurement '.

The tonnages recorded in the two categories have been aggregated in Tables 36–9 in order to provide a ready comparison of the volume of cargo handled at the several ports or in different periods. In Tables 29–35 details of cargo handled are presented separately on the basis of ' tons weight ' and ' tons measurement '.

The tonnages appearing in Tables 30–5, which are actual tonnages as recorded on ships' manifests, cannot be reconciled with those shown in Tables 29 and 36–9 because a port authority, for the purpose of calculating cargo handling charges, may classify items of cargo, as between ' tons weight ' and ' tons measurement ', in a manner different from that shown on the ship's manifest.

**General.** The information published in Tables 23–8 for 1966–67 and 1967–68 is not available on a strictly comparable basis for 1965–66 which is therefore not presented in the tables. Some data for 1965–66 is, however, held in the records of the Western Australian Office of the Bureau of Census and Statistics and is available on request.

Motor Vehicle Registrations—

The Traffic Act provides for the registration of motor vehicles throughout the State, but those owned by the Commonwealth Government are not required to be licensed under the Act. Particulars of Commonwealth Government-owned vehicles (excluding those of the defence services) listed with the Commonwealth Motor Vehicle Registry, Canberra are shown in footnote (*f*) to Table 53.

In Western Australia there is no single authority responsible for the licensing of motor vehicles. The Traffic Branch of the Police Department issues licences in the Metropolitan Traffic Area (see below) and other areas as prescribed. Outside these areas each Town Council or Shire Council is responsible for the licensing of vehicles in its own district. Statistics are compiled from the records of each licensing authority.

The *Metropolitan Traffic Area* refers to the area as defined in Regulations made under the Traffic Act. From 1 October 1966 the boundary of the area was extended to include the whole of the Shire of Armadale-Kelmscott instead of, as formerly, only part of the Shire. The local government areas which comprised the Metropolitan Traffic Area at 30 June 1968 are shown below. Cities are marked (C) and Towns (T) ; all other local government areas listed are Shires.

Armadale-Kelmscott
Bassendean
Bayswater
Belmont
Canning
Claremont (T)
Cockburn
Cottesloe (T)
East Fremantle (T)

The *Perth Statistical Division* was constituted with effect from 1 January 1966. It includes the whole of the Metropolitan Traffic Area, the Shires of Kalamunda, Serpentine-Jarrahdale and Wanneroo in their entirety, and those parts of the Shires of Mundaring and Swan-Guildford outside the Metropolitan Traffic Area.

## NOTES ON STATISTICS OF AGRICULTURE AND LIVESTOCK

### SOURCES OF INFORMATION

1. The statistics relating to agriculture and livestock, as published in this Part of the Statistical Register, are, in the main, compiled from statutory returns supplied annually at 31 March by occupiers of rural holdings in Western Australia.

2. Additional information is obtained from entirely separate collections covering slaughtering and bee keeping and from various authorities.

### PERIOD COVERED

1. Data relating to area sown, production, yield per acre and number of holdings growing crops are, in general, for the season ended 31 March. In cases where harvesting has not been completed by 31 March (*e.g.* potatoes, apples, pears, cotton) total production, including quantities harvested after 31 March, is recorded. A seasonal calendar showing approximate times of sowing or planting, harvesting, lambing and shearing appears on page 8 of this Part.

2. Livestock numbers are as at 31 March and livestock products are, in general, for the year ended 31 March. Slaughterings are for the year ended 30 June.

3. Statistics of bee keeping relate to hives as at 30 June and production for the year ended 30 June.

4. Particulars of farm machinery are as at 31 March.

### DEFINITIONS AND EXPLANATORY NOTES

1. **Rural Holdings**—For statistical purposes a 'rural holding' is defined as a piece of land of one acre or more in extent, used for the production of agricultural products (including fruit and vegetables, nursery plants, etc.) or for the raising of livestock (including poultry) and the production of livestock products. Holdings of less than one acre on which commercial market gardens, nurseries, poultry farms or hatcheries are operated are also included.

An occupier who works more than one holding is generally required to supply a separate annual return for each holding, particularly if the holdings are situated in different local government areas. If, however, the holdings are not far apart and are worked as one, the occupier may (and in most instances does) supply a single composite return covering the holdings concerned. The holdings covered by a composite return are treated, for statistical purposes, as forming a single rural holding. Where a holding extends into two or more local government areas, the holding and all operations on it are attributed to the local government area in which the homestead is located.

2. **Area of Crops**—The total area of land sown or planted to crops is shown irrespective of whether the whole area was harvested or whether a portion or the whole of the crop failed and was not harvested. In the case of fruit and vegetables, only commercial areas are included.

Where two successive crops are grown on the same land during one season, the land is included twice in area of crops except in Tables 3 and 4 where it is counted once only in 'Cleared land used for crop'.

No data on the area planted to individual types of orchard fruits are collected but estimates, based on the reported total orchard acreage and the number of trees of each variety planted, are made and are published in this Part.

Percentages appearing in Table 12 have been corrected to the first place of decimals without making any adjustment which would be necessary to make the percentages so expressed add to precisely 100.

3. **Yield per Acre**—Figures published in this Part relate to yield per acre sown or planted. Acreages of crops harvested are not recorded and consequently particulars of yields per acre harvested are not available. In the case of apples, pears and oranges yields are shown in terms of 'per acre of bearing trees'.

4. **Population of Rural Holdings**—Persons of all ages residing on rural holdings at 31 March are recorded, including those temporarily absent but excluding guests and visitors.

5. **Employment on Rural Holdings**—Details are collected in the general farm census of persons working on rural holdings at 31 March. Persons working permanently full-time exclude casual or seasonal workers, females engaged principally in domestic duties, children attending school and other persons who work only part-time.

Attention is drawn to the difficulty encountered in compiling data on a comparable basis, from year to year, of persons employed. The difficulty applies particularly to females and arises because of the tendency of many farmers to include part-time family helpers in their returns as full-time workers. It is necessary in compiling the returns to exclude a considerable number of these workers and, while all possible care is taken in doing this, it is difficult to ensure that the treatment is consistent from year to year. For this reason no information on female employment is published in this Part.

6. **Livestock Slaughtered**—Monthly returns are collected from principal slaughterers (abattoirs, meat works and bacon factories) and these, together with annual returns from all other slaughterers (a special return from country butchers and the general census return from farmers and pastoralists) provide the necessary data for compiling estimates of all livestock slaughtered.

7. **Bushel Weights**—The production of cereals, fruit and certain other commodities is generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation on account of such factors as method of packing and size and variety within each kind of product. The average bushel equivalent weights set out below may be used to convert production to pounds weight avoirdupois.

| Product | Weight per bushel | Product | Weight per bushel | Product | Weight per bushel |

## STATISTICAL DIVISIONS AND LOCAL GOVERNMENT AREAS

1. From 1929–30 Western Australian statistics of agriculture and livestock have been tabulated according to Local Government Areas. In this Part in the tables where information for separate Local Government Areas is published, the district designations and names used are those which were current at 31 March 1967. No change in the name or designation of a local government area occurred during 1966–67.

2. Local Government Areas of the State are grouped into ten Statistical Divisions and a table showing the Cities, Towns and Shires comprising these Divisions at 31 December 1966 is shown on page 125 and a list of Local Government Areas at the same date is given on page 126. A map showing the boundaries of Statistical Divisions and Local Government Areas is attached inside the back cover.

3. Data relating to agriculture and livestock in local government areas outside the Perth Statistical Division which are designated 'Towns' are combined with those for the surrounding or adjacent Shire (except in the case of the Town of Bunbury, for which separate figures are shown). Thus particulars for the Towns of Albany, Narrogin and Northam are included with those for the Shires of the same name, those for the Town of Geraldton with the Shire of Greenough, and for the Towns of Kalgoorlie and Boulder with the Shire of Kalgoorlie. Separate statistics of agriculture and livestock are not compiled for the Cities of Fremantle, Nedlands, Perth, South Perth and Subiaco; the Towns of Claremont, Cottesloe, East Fremantle, Melville, Midland and Mosman Park; and the Shires of Bassendean, Bayswater, Belmont, Canning, Peppermint Grove and Perth. Totals for these areas are shown in the relevant tables under 'Other districts' in the Perth Statistical Division. Separate statistics for the Shires of Carnarvon and Exmouth are not available for publication.

4. The areas of local government districts at 30 June 1967 are shown in Table 3 on pages 10 to 13. Official estimates of areas, usually shown in square miles, have been converted to acres for comparison with the statistics of rural land utilisation which are shown in the table. The only transfer of land between districts during the year ended 30 June 1967 was the transfer of 67 acres from the Shire of Gnowangerup to the Shire of Katanning on 22 June 1967. This has been taken into account in calculating the areas shown.

## TYPE AND SIZE CLASSIFICATION OF RURAL HOLDINGS, SEASON 1965–66

Special tabulations relating to the classification of rural holdings by type of farming activity and size of principal activities are published in a bulletin, issued by the Commonwealth Statistician, Canberra, which is available for reference at the Office of the Deputy Commonwealth Statistician for Western Australia.

## SEASONAL CALENDAR

The following calendar is intended to show the main periods when principal agricultural and pastoral activities are carried out in Western Australia. Operations are generally confined to the periods shown but are subject to variation according to such factors as geographical location within the State, the variety of seed sown (or trees and vines planted) and exceptional seasonal conditions.

| Crop | Period | |
|---|---|---|
| | Sowing or planting | Harvesting |
| Pastures— | | |
| Clovers | April to June | December to April |

# SECTION 8—VALUE OF PRODUCTION

## I. PRIMARY PRODUCTION

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised at the principal market. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the principal markets.

(*b*) *Marketing Costs* comprise freight, cost of containers, commission, and other charges incurred in marketing.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting *Marketing Costs* from *Gross Value*.

(*d*) *Cost of Goods Consumed in the Process of Production* covers seed and fertilisers used, pickling, sprays, dips, fodder consumed, fuel and oil, and other selected costs of a similar nature.

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) and is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income. It is obtained by deducting from *Local Value* the *Cost of Goods Consumed in the Process of Production.*

*Gross* and *Local Values* of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (*e.g.* hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the *Net Value* of primary production by deducting the cost of both primary and secondary products consumed by primary industries. Therefore, *Net Value* of primary production should be used when comparing or combining values for primary industries with those for secondary industries.

## II. MANUFACTURING

(*a*) *Value of Output* is the selling value 'at the factory' (*i.e.* the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

(*b*) *Cost of Goods Consumed in the Process of Production* covers materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and materials used for packing.

(*c*) *Net Value of Production* is the value added in the course of manufacture and is the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit. It is obtained by deducting from the *Value of Output* the *Cost of Goods Consumed in the Process of Production.*

In the process of manufacture, the output of one factory may become the raw material of another and aggregations of values of factory output therefore involve considerable duplication. However, in arriving at *Net Value* of production, *i.e.* value added by the process of manufacture, no duplication occurs as the value added by each factory is taken into account once only. Because of this, and as much of the output of primary industry becomes raw material of secondary industries, *Net Value* of factory production (as defined above) should be used when comparing or combining values for secondary industries with those for primary industries.

## No. 62—Monthly Average Prices of Fruit: Metropolitan Markets, 1967

($)

NOTE. The average prices shown in this table have been computed from a systematic sample of auctioneers' records of fruit sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognised season does not reach a significant proportion of sales for the year, a price has not been shown. In computing the annual averages, however, all sales have been included.

## EXPLANATORY NOTES AND DEFINITIONS

**Definition of Factory.** For statistical purposes a factory is defined as any establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year, or power other than manual is used.

**Classification.** In the case of a factory which engages in more than one industry on the same site a separate return is obtained, where possible, for each industry. Each of these components is then classified as if it were a separate factory. However, where it is not practicable for the manufacturer to submit separate returns, the factory is classified to the predominant activity, *e.g.* a factory *principally* engaged in manufacturing Ice but also producing Aerated Waters and Cordials would be classified to Ice and Refrigeration if separate returns were not available.

**Confidential Information.** The Acts under which these statistics are collected require that information supplied on any individual return must be treated as confidential. For this reason it has not been possible to publish some items and in other cases it has been necessary to combine details for publication. As these confidential provisions apply throughout Australia, separate details have been withheld in some instances in order to prevent disclosure of confidential information in respect of individual States. The tables affected carry appropriate footnotes.

**Employment.** Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (*e.g.* persons employed by sawmills in felling and hauling logs) and persons engaged in selling or distribution. Working proprietors are included unless otherwise stated.

Average employment figures may be expressed as an average ' over the period worked ' or as an average ' over the whole year '. Thus a factory which operates for only six months of the year and employs twenty persons throughout that period has an average employment of twenty ' over the period worked ', but an average of only ten ' over the whole year '. The type of average is indicated in each table.

**Value of Output.** The 'value of output' is the selling value ' at the factory ' (*i.e.* the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

**Net Production.** ' Net production ' is the value added in the course of manufacture and is the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit. It is obtained by deducting from the 'value of output' the cost of goods consumed in the process of production. The costs deducted are those of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and materials used for packing.

In the process of manufacture the output of one factory may become the raw material of another and aggregations of values of factory output therefore involve considerable duplication. However, in arriving at value of ' net production ', *i.e.* value added by the process of manufacture, no duplication occurs as the value added by each factory is taken into account once only.

**Land and Buildings, Plant and Machinery.** Values shown represent depreciated or book values at end of each period and include estimated values in cases where premises and plant and machinery are rented by the occupier.

**Local Government Areas.** The district designations and names used are those which were current at 30 June 1967.

A change in designation which occurred after 30 June, 1967 and has therefore not been taken into account, is as follows :

The designation of the Town of Melville was changed to the City of Melville, with effect from 3 May 1968.

**Statistical Divisions.** A map showing Statistical Divisions and their component local government areas appears in Part V of the *Statistical Register of Western Australia*, the *Abstract of Statistics of Local Government Areas*, and the *Western Australian Year Book.*

**Rounding of Figures.** Monetary amounts appearing in Tables 55–56, and 59–61 have been rounded to thousands of dollars without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

Percentages appearing in Table 10 have been calculated to the second place of decimals without making those adjustments which would be necessary to make the percentages so expressed add to precisely 100.

(*a*) Excludes working proprietors.

(*b*) It should be noted that there is a break in the continuity of the index-number series between June and July 1935, owing to the inclusion, from July 1935 onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

(*a*) Cities are marked (C), Towns (T) ; all other local government areas are Shires. The names of local government areas used in this table are those which were effective at 30 June 1967. A map showing local government areas and Statistical Divisions is published in Part V of the *Statistical Register*, the *Abstract of Statistics of Local Government Areas*, and the *Western Australian Year Book*. (*b*) See 'Explanatory Notes and Definitions' on page 4. (*c*) Average over whole year. (*d*) Excludes amounts drawn by working proprietors. (*e*) Not available for publication.

(a) Defined as the area comprised within a radius of 15 miles from the General Post Office, Perth. (b) As defined in the Land Act but excluding the Metropolitan Area. (c) The first State Basic Wage operated from 1 July 1926. (d) On 22 September 1964 The Western Australian Industrial Commission, after a comprehensive inquiry, declared rates of $30·80 for males and $23·10 for females to apply uniformly throughout the State. Subsequent variations continued to be made on this basis. (e) The rates shown are those which applied until a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from $36·55 to $37·55; 'that the wage rates for adult workers not in receipt of the "minimum wage" be increased by 60 cents per week; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount'. These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. A further increase of $1·35 a week for adult males and adult females was granted by the Industrial Commission in October 1968 to operate from the beginning of the first pay-period commencing on or after 25 October 1968. (f) Rates prescribed under the provisions of the *Industrial Arbitration Act Amendment Act, 1968.*

(a) Comprises gold refined at the Perth Branch of the Royal Mint and gold contained in gold-bearing materials exported. Figures for individual years do not agree with mine production, quoted in Tables 1, 3, 4 and 5, because of the delay between production at the mine and refining at the Mint. (b) See footnote (a) to Table 5. (c) Comprises gold in ores and concentrates exported. (d) Subsidy operative from 1955. (e) From 1890 to 31 December 1966.

## NOTES

(i) *Local Government Legislation.* The Local Government Act of 1960 repealed the *Municipal Corporations Act, 1906* and the *Road Districts Act, 1919.* An outline of the main financial and procedural changes resulting from the operation of the Local Government Act is given in the issue of Part XI—*Local Government* for 1961–62. A general description of the Local Government system appears in Chapter III—*Constitution and Government* of the *Official Year Book of Western Australia,* Nos. 3–5 and in Nos. 6 and 7 of the *Western Australian Year Book.*

(ii) *Vermin Boards and Water Boards.* Financial transactions in connection with vermin control (with some exceptions) are included in the Annual Statement of Receipts and Payments of the local government authorities concerned. However, it has been found administratively expedient for a small number of Vermin Boards and Water Boards to remain financially independent. Statistics relating to these Boards are presented separately in Table 9. The figures appearing in Tables 10–12 include the transactions of both Vermin Boards and Water Boards.

For detailed statistics of water supply, sewerage and drainage, the reader is referred to Part VII—*Mineral Statistics and Water Conservation* of the *Statistical Register* and to the Annual Reports of the Metropolitan Water Supply, Sewerage, and Drainage Board and the Department of Public Works and Water Supply.

(iii) *Eastern Goldfields Transport Board.* The Eastern Goldfields Transport Board operates an omnibus service in the Kalgoorlie-Boulder urban area, under an agreement with the Kalgoorlie and Boulder Town Councils and the Kalgoorlie Shire Council. Its financial transactions are not included in the figures shown in Tables 10–12 but are summarised in Table 15.

(iv) *Statistical Divisions.* The Statistical Divisions referred to in this publication comprise groups of complete and contiguous local government areas and are shown on a map appearing in Part V of the *Statistical Register of Western Australia,* the *Abstract of Statistics of Local Government Areas* and the *Western Australian Year Book.*

In Tables 1–7, local government areas have been arranged alphabetically within each Statistical Division. To facilitate reference to the tables, an index list of local government areas is provided on page 41.

(v) *Local Government Areas.* In this Part, in the tables where information for separate local government areas is published, the names and designations used are those which were current at 30 June 1967. No change in the name or designation of a local government area occurred during 1966–67. A change of designation which occurred after 30 June 1967, and has therefore not been taken into account, took place on 3 May 1968 when the Town of Melville became the City of Melville.

(vi) *Rounding of Figures.* Monetary amounts appearing in Tables 10–13 have been rounded to thousands of dollars without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

(*a*) Before an amendment to the Australian Constitution in 1967, it was provided by section 127 that ' in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted '. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration* (*Aboriginals*) 1967, came into operation on 10 August 1967. All population statistics appearing in Table 2 of this issue of Part XI refer, for the first time, to total population, *i.e.* including Aborigines. The numbers of dwellings are also on the basis of total population. (*b*) The numbers shown include ' private ' and ' non-private ' dwellings, both occupied and unoccupied. The term ' dwelling ', as used in this publication, means any habitation occupied (or intended for occupation) by a household group living together as a domestic unit, and may comprise the whole of a building or only part of it. The term has therefore a very wide reference and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. The figures shown for dwellings at the Census of 30 June 1966 are subject to revision. (*c*) Includes ' migratory ' population.

(*a*) Comprises 5 Cities, 13 Towns and 126 Shires at 30 June 1967. (*b*) The figures are estimates except those shown for 30 June 1961 and 1966 which are derived from Censuses. (*c*) Population statistics for 30 June 1961 and later refer to total population, *i.e.* including Aborigines. For dates prior to 30 June 1961, full-blood Aborigines are excluded ; see footnote (*a*) to Table 2. All figures shown include ' migratory ' population. (*d*) Census figure, which excludes dwellings occupied solely by full-blood Aborigines. For definition of ' dwelling ' see footnote (*b*) to Table 2. (*e*) The number of dwellings shown is on the basis of total population, *i.e.* including Aborigines ; see also footnote (*d*) above and footnote (*a*) to Table 2. (*f*) Includes concrete surface which totalled 5 miles at 30 June 1967. (*g*) Includes limestone and granite. (*h*) Comprises roads mainly of natural surfaces, formed but not metalled or otherwise prepared. (*i*) Unprepared except for certain clearing. Particulars are incomplete as information for some Shires is not available.

# PART XII—RETAIL PRICES, WAGES, EMPLOYMENT AND MISCELLANEOUS

## SECTION 1—RETAIL PRICES

Prices of a limited range of commodities are recorded in the Blue Books of Western Australia from the early years of settlement. It was not until 1911, however, that a systematic collection of retail prices statistics, undertaken by the Commonwealth Statistician, was begun. The results of this inquiry were published in 1912 and thus, for the first time, particulars of retail prices in a selection of Western Australian towns became available. As well as providing data for each of five principal towns for the year 1911, the published information contained particulars for the capital city for each year from 1901 to 1910, the scope of the investigation having been specially extended for this purpose. The 46 commodities included in the collection, in addition to house rent, comprised a representative range of groceries, dairy produce and meat. The field of collection was later expanded to cover other groups of household expenditure.

Prices are now collected regularly for items of food ; clothing and drapery ; housing ; household supplies and equipment ; and miscellaneous commodities and services.

Representative and reputable retailers and service establishments are selected for each class of commodity and each service. These informants furnish regular returns of prices. Whenever necessary, particulars of prices are also obtained from other firms. For food items, prices are collected monthly, as at the 15th of each month, and are averaged for the three months of the quarter. For most other items prices are obtained quarterly as at the 15th of the middle month of the quarter. In general, prices are collected from actual vendors at retail selling outlets. The prices are those actually being charged for normal cash purchases of new articles. ' Bargain ' or ' sale ' prices of imperfect goods or discontinued lines are not used.

The information is collected, under authority of the *Census and Statistics Act* 1905–1966, for specified ' standards ' of the commodities and services priced. Specifications include the unit of quantity to be priced, the grade, quality, size, style, etc. and in some cases the particular brand and the manufacturer's ' line ' number. The standards selected are those with a considerable volume of sales and likely to remain representative over a long period.

The items and standards priced are revised from time to time to keep them in harmony with changing conditions. Before each quarterly collection the standards of all items are reviewed after extensive inquiries among manufacturers, wholesalers and retailers. Where changes in the items or standards priced become necessary, suitable adjustments are made in compiling price series to ensure that they reflect only changes in prices for representative goods of constant quality and not differences in prices of differing standards.

The actual collection of information is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who not only receive and check returns but visit the shops or other establishments concerned.

Table 5 on page 10 shows the average retail prices in the metropolitan area of 37 items of food and groceries during each month of 1967.

### RETAIL PRICE INDEX NUMBERS

The collected information relating to prices of goods and services may be summarised in the form of index numbers. Prices of items, selected as being representative of a high proportion of the expenditure of wage-earner households, are combined at regular intervals by the use of ' weights ' in approximate proportion to quantities actually used. The aim is to express as a single number the degree of change in prices for the selected field taken as a whole. In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

Basically, in the simplest method of compiling retail price indexes the price of each item is multiplied by a fixed quantity or ' weight ', the product being an ' expenditure '. The sum of these products for all items at any given date represents an ' aggregate expenditure '. The ' aggregate expenditures ' for successive periods are converted into an index series by equating the aggregate for a selected or ' base ' period to 100 (or some other convenient number), and calculating all index numbers to this base according to the ratio which the several aggregates bear to that of the base period.

The ' A ' Series Index was first compiled in 1912 and although it was both rudimentary and of limited scope, covering only food, groceries and house rents, it was not discontinued until 1938. The ' C ' Series Index was first compiled in 1921, and retrospectively to 1914, to supply the need for a more adequate index. It was originally described as the ' All Items ' Index, to distinguish it from the ' A ' Series, because it included, in addition to food, groceries and house rents, many items of clothing, household drapery and utensils, fuel, lighting, fares, smoking and some other miscellaneous items.

## RETAIL PRICE INDEX NUMBERS—*continued*

The list of component items and the weighting pattern of the ' C ' Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936, but otherwise remained almost unchanged until the index was discontinued in 1960. From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls, including rationing, caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes in the index desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Commonwealth Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the ' C ' Series Retail Price Index, in the light of the new pattern of wage-earner expenditure and consumption that appeared to be then emerging. However, there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing ' C ' Series Index on the 1936 revision. A conference of Statisticians considered the matter in June 1953, and resolved, in part, as follows :

' (a) That, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period, it is undesirable to make a general revision of the list of items and weighting system of the ' C ' Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes.

(b) That an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure.'

The ' C ' Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index, with the year 1952–53 as its base, was introduced in 1954 and continued until the March quarter of 1960. This Interim Index was a transitional index designed to measure retail price variations on the ' C ' Series model in terms of post-war consumption weights, as emerging in the early 1950s. It embraced a wider range of commodities and services than did the ' C ' Series Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index, concurrently with their happening in those years. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

During this period home-owning largely replaced the renting of privately-owned houses, the numbers of government-owned rented houses increased appreciably, the use of the motor car greatly increased and partly replaced use of public transport, various items of electrical household equipment and television came into widespread use, household consumption of electricity greatly increased, and technological developments such as the introduction of new synthetic materials produced a number of changes in clothing and other groups of items. Through the impact of these continuing changes in usage, combined with disparate movements in prices, the Interim Retail Price Index became outmoded. As studies progressed and new data became available, it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

## THE CONSUMER PRICE INDEX

The Consumer Price Index was first compiled in 1960, retrospectively to the September quarter of 1948. It replaced both the ' C ' Series Retail Price Index and the Interim Retail Price Index in official statistical publications. The title ' Consumer Price Index ' is used for purposes of convenience and does not imply that the new index differs in definition or purpose from previous retail price indexes. The Index is designed to measure quarterly variations in retail prices of goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditure and not to estimated expenditures of an ' average ' or individual household of specified size, type, or mode of living. It is thus possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Investigations revealed that the incidence and frequency of changes in the pattern of household expenditure since 1950 were such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals, rather than on the basis of a list of items and set of weights which remained unchanged throughout the period. Five series for short periods (September quarter 1948 to June quarter 1952 ; June quarter 1952 to June quarter 1956 ; June quarter 1956 to March quarter 1960 ; March quarter 1960 to December quarter 1963 ; and from December quarter 1963) have therefore been constructed and linked to form a continuous series.

## THE CONSUMER PRICE INDEX—*continued*

At times of linking the weighting pattern was altered and, in addition, new items (mainly those that had become significant in household expenditure) were introduced. In each period between links the items and weighting have remained unchanged.

The Consumer Price Index covers a wide range of commodities and services arranged in the five major groups, Food; Clothing and Drapery; Housing; Household Supplies and Equipment; and Miscellaneous. It is designed only to measure the proportionate change in prices as combined in the individual groups, or the aggregate of the groups in the index. This is a basic principle of all price indexes, and failure to appreciate it gives rise to misconceptions concerning price indexes and their uses. Consumer (retail) price indexes are sometimes loosely called ' cost of living indexes ' and are thought to measure changes in the ' cost of living '. Neither the Consumer Price Index, nor any other retail price index, measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes. But the change in prices of goods and services is a very important part of the change in any cost of living and this part is measured by consumer (retail) price indexes.

The following summary gives a general description of the nature of the items included in the several groups which together comprise the Consumer Price Index.

Food—Meat (fresh and processed); dairy produce: cereal products; soft drink, ice cream and confectionery; potatoes, onions and preserved fruit and vegetables; and other foods including sugar, jam, margarine, tea, coffee, baby foods, and sundry canned and other foods.

Clothing and Drapery—Men's, women's, boys' and girls' clothing; men's, women's and children's footwear; household drapery; and piecegoods and knitting wool.

Housing—Costs (house price, rates, repairs and maintenance) involved in home ownership or purchase by instalments; and rent paid to a private owner or government authority.

Household Supplies and Equipment—Household appliances; fuel and light; and household articles including furniture (from December quarter 1963), floor coverings, kitchen and other utensils, gardening and small tools, household sundries, personal requisites, proprietary medicines and school requisites.

Miscellaneous—Transport (train, tram and bus fares and private motoring costs); beer; tobacco and cigarettes; services such as hairdressing, dry cleaning, shoe repairs and postal and telephone services; and other expenditure including costs of radio and television operation, cinema admission and newspapers.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

The sets of weights used have been derived from analyses of statistics of production and consumption, the Population Censuses of 1947, 1954 and 1961, the Censuses of Retail Establishments of 1948–49, 1952–53, 1956–57 and 1961–62 and the continuing Survey of Retail Establishments; from information supplied by manufacturing, commercial, and other relevant sources; and from special surveys. As from the December quarter 1963 the weights, in general, are based on the pattern of consumption of the years 1957-58 to 1961–62.

The index has been compiled for each quarter from the September quarter of 1948, and for each financial year from 1948–49. (Comprehensive series of Consumer Price Index numbers *ab initio* are given in Tables 1 to 7 of Part XII of the *Statistical Register* for 1959–60). ' All Groups ' index numbers, and group index numbers for each of the five major groups, are compiled and published regularly for the six State capital cities separately and combined. The reference base for *each* of these indexes is: Year 1952–53 = 100·0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted merely to avoid the minor distortions that would occur in rounding off the figures to the nearest whole number.

The separate city indexes measure price *movements* within each city individually. They enable comparisons to be drawn between cities as to differences in the degree of *price movement*, but not as to differences in the *actual price level* since the index for each city is independently based, on the prices recorded *in that city* during 1952–53. Similarly, the separate group indexes measure price movements of each group individually. They enable comparisons to be drawn as to differences in the degree of price change in the different groups, but do not show the comparative cost of the different groups.

The index for the six capital cities combined is a weighted average of price movement in the individual cities. The relative influence of the several cities on the combined index is determined by their populations at the 1954 Census for periods to the December quarter 1963. From the link made as at the December quarter 1963 the weights of the individual cities have been revised on the basis of the results of the 1961 Census.

The foregoing summary of the main features of the Consumer Price Index has been prepared from publications issued by the Commonwealth Statistician, Canberra, among them being the *Labour Report, 1964 —No. 51,* which contains a detailed description of the Index.

## RETAIL PRICE INDEX NUMBERS, 1901 TO 1967

The index numbers shown in the following table are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are : from 1901 to 1914, the ' A ' Series Retail Price Index ; from 1914 to 1946–47, the ' C ' Series Retail Price Index ; from 1946–47 to 1948–49, a composite of Consumer Price Index Housing Group (partly estimated) and ' C ' Series Index excluding Rent ; from 1948–49 to 1967, the Consumer Price Index.

(*a*) See *Special Note* below. (*b*) The rates shown are those which applied to adult male workers. In the period from December 1950 to June 1967 the female rate was fixed at 75 per cent of the male rate; previously it had ranged from 54 per cent up to 75 per cent of the male rate. (*c*) Rates operative from beginning of first pay-period commencing in the month shown or commencing on or after the date shown.

SPECIAL NOTE. The latest wage rates shown in this table applied before a decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were increased by $1 a week from the same date. In October 1968 a further increase of $1.35 a week for adult males and adult females was granted by the Commission to operate from the beginning of the first pay period commencing on or after 25 October 1968.

(*a*) From 22 September 1964, rates declared to apply uniformly throughout the State. For earlier periods, the rates shown are those which applied to the area comprised within a radius of 15 miles from the General Post Office, Perth. (*b*) Female rate increased to 65 per cent of male rate as from 1 December 1951. (*c*) Female rate increased to 75 per cent of male rate from beginning of first pay-period commencing on or after 30 January 1960. (*d*) The rates shown are those which applied before a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from $36.55 to $37.55 ; ' that the wage rates for adult workers not in receipt of the " minimum wage " be increased by 60 cents per week ; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount '. These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. A further increase of $1.35 a week for adult males and adult females was granted by the Industrial Commission in October 1968 to operate from the beginning of the first pay-period commencing on or after 25 October, 1968, (*e*) Rates prescribed under the provisions of the *Industrial Arbitration Act Amendment Act*, 1968.

## No. 10—Weighted Average Minimum Weekly and Hourly Wage Rates

NOTE. The minimum wage rates and index numbers in the following table embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The weekly wage rates shown in the table and used in the compilation of the indexes are the lowest rates payable for a full week's work (excluding overtime), as prescribed in representative industrial awards, determinations and agreements. The hourly wage rates are obtained by relating the weekly wage rates and the weekly hours of work prescribed in awards, etc. The rural industries are excluded from the table.

The wage rates shown should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends.

A more detailed description of the Minimum Wage Rate Index and tables giving figures for additional dates are published in the mimeographed statement *Minimum Wage Rates, March 1939 to June 1965* issued by the Commonwealth Statistician, Canberra.

(*a*) Based on employment and salaries and wages recorded on Pay-roll Tax returns and from other direct collections and estimates. Particulars of wages and salaries paid are not available for males and females separately from the sources mentioned and average weekly earnings have therefore been calculated in terms of 'male units'. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings in Australia. ' Earnings ' include salaries, wages at award rates, overtime earnings and over-award and bonus payments.

NOTE. Quarterly figures are affected by seasonal influences. Comparisons as to trend are therefore best made by relating complete years or corresponding quarters. However, from December quarter 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

# SECTION 3—EMPLOYMENT

NOTE. In addition to the employment data appearing in this Part, details of the numbers of persons engaged in particular activities are given elsewhere in the *Statistical Register*. Part IV, for example, shows the numbers employed in railway operations, road passenger transport and ferry services and post, telegraph and telephone services. Part V gives details of employment on rural holdings and in fishing and pearling ; Part VI, in factories ; Part VII, in mining and quarrying ; Part IX, in hospitals and infant health services ; and Part X, in educational institutions. *In accordance with the requirements of the Australian Constitution (as provided by section 127, repealed with effect from 10 August 1967), particulars of full-blood Aborigines are excluded from all tables in this Section which contain information compiled from census schedules.*

---

The most detailed and comprehensive statistics of employment of the population are those which are derived from the periodic Population Census. Among the most useful of the tabulations based on these enumerations are those which classify the population according to industry and occupational status.

## THE WORK FORCE

It is customary in modern census practice to distinguish between the economically active and inactive sectors of the community on the basis of those ' In the Work Force ' and those ' Not in the Work Force.'

The work force comprises all persons who are actively engaged in an industry, business, trade or service, as well as those who are normally engaged in such an activity but are not at work at the time of the investigation. It includes employers, the self-employed, wage and salary earners, persons helping in an activity without receiving wage or salary (other than those usually working in such activity for less than fifteen hours per week), and those not at work.

The 1966 Census work force statistics are not strictly comparable with those of earlier censuses. For a detailed explanation of the new approach adopted at the 1966 Census, the reader is referred to *Census Bulletin No. 5.1—Summary of Population : Western Australia*, issued November 1967 by the Commonwealth Statistician, Canberra. The net effect of the new definition is to include approximately 8,100 additional persons in the Western Australian work force, a proportional increase of approximately 2.4 per cent.

### Classification according to Industry

For statistical purposes, industry may be defined as any single branch of productive activity, trade or service. It is concerned with the activities of persons, firms or businesses considered as a group producing the same commodity, performing the same process or providing the same service. All persons engaged in any such branch of economic activity are classified industrially as belonging to that particular branch irrespective of their personal occupation within the industry. Examples are : Mining, which includes, in addition to miners and prospectors, such persons as laboratory technicians, transport workers and office staff employed by mining companies ; Shipping, which covers staff members of shipping companies and agencies, as well as ships' crews ; professional activities such as Medicine, Law and Architecture which include not only qualified practitioners but also persons employed by them as, for example, receptionists, law clerks and draftsmen.

Classification according to industry at the 1966 Census has been made on the basis of the *Classification and Classified List of Industries—Revised : June, 1966*, published by the Commonwealth Statistician, Canberra. The classification divides the work force into 14 Major Groups which, in turn, are divided into 53 Sub-groups and 342 Industry Categories.

It should be noted that the particulars shown under *Public Authority Activities* (*n.e.i.*) are residual figures comprising those persons in the administrative sphere of general government, local government and foreign consular services who have not been classified elsewhere. They do not, therefore, represent the total numbers of persons engaged in or attached to all fields of government service, Commonwealth, State or Local. For example, employees of the Railways Commission have been assigned, in accordance with evidence contained in their census schedules, to Railway workshops in the sub-group *Manufacture, Assembly and Repair of Ships, Vehicles, Parts and Accessories* ; to Motor bus services in the sub-group *Road Transport* ; to Construction and maintenance of permanent way in the sub-group *Construction Works and Maintenance (other than Buildings)* or to Rail services under *Rail and Air Transport*. Further examples of this allocation of government workers to industries other than *Public Authority Activities* (*n.e.i.*) are provided by Departments such as Education, Public Works, Postmaster-General's, Repatriation, and local government authorities.

### Classification according to Occupational Status

Occupational status of persons classified as in the work force at Population Census dates covers two broad groups ; those at work and those not at work (*i.e.* unemployed). The first group comprises employers, self-employed persons, employees (on wage or salary), and unpaid helpers. The category ' unemployed ' includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the census by reason of sickness, accident, etc., or because they were on strike, changing jobs, or temporarily laid off, etc. It also includes persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the census. The numbers shown as ' unemployed ' in Table 17, therefore, do not represent the number of unemployed available for work and unable to obtain it.

### Classification according to Occupation

Occupation is defined as the nature of the work which a person performs, and implies *personal* performance. It may be based on the material treated, the process carried out or the type of service rendered by an *individual* worker. Thus the occupation of a person is the kind of work that he or she personally performs, as distinct from industry, which is defined as any single *branch of productive activity, trade or service* and is not concerned with the nature of personal performance.

The Classification of Occupations used in the tabulation of the 1966 Census data has been adapted from and closely adheres to the principles embodied in the International Standard Classification of Occupations issued by the International Labour Office, Geneva, 1958. The International Standard Classification of Occupations was prepared after extensive discussions and research by world experts in this field, to provide an adequate classification framework for countries interested in occupational classification, and, at the same time, provide a basis for international comparison of occupational data obtained mainly from Censuses of Population.

The Australian Classification of Occupations contains 11 Major Groups, 72 Minor Groups and 313 Occupation Categories. In accordance with the International Standard Classification, occupations have been grouped by the general similarity of the characteristics of the work they entail. The most important feature of each minor group is that the occupations included are more closely related to each other than to occupations outside the minor group as regards the functions involved and the skills, knowledge and abilities required for satisfactory performance. Other factors taken into consideration in forming these groups have been material worked on, workplace environment, use of specialised equipment, etc.

The data appearing in Table 19 are restricted to the 11 Major Groups and the 72 Minor Groups of the Australian Classification of Occupations. Complete descriptions of Major Groups, Minor Groups and Categories, together with a list of occupation tables included under each heading, are contained in the *Classification and Classified List of Occupations—Revised : June 1966*, published by the Commonwealth Statistician, Canberra.

## ESTIMATES OF EMPLOYMENT

In addition to employment data provided by the census, there are available monthly estimates of the number of wage and salary earners in civilian employment, excluding employees in rural industry (comprising agriculture, grazing and dairying) and private domestic service. The prime purpose of this series is to measure, as nearly as possible with available data, *current monthly trends* in employment in the defined field.

Estimates for months prior to June 1954 are not available on a basis comparable with that used for June 1954 and later. The statistics are based on comprehensive ' benchmark ' data derived for the purpose from the Population Censuses of June 1954 and June 1961. Figures for periods between and subsequent to the two benchmark points in time are estimates obtained from three main sources, (i) Pay-roll Tax returns, which are lodged by all employers paying more than $400 per week in wages, other than those specifically exempted under the *Pay-roll Tax Assessment Act* 1941–1967, (ii) returns from government bodies, and (iii) some other direct current records of employment, *e.g.* for hospitals. The data thus derived are supplemented by estimates of the changes in number of wage and salary earners not covered by these collections. As they become available, particulars of employment obtained from other collections, notably the annual factory census and the censuses and sample surveys of retail establishments are used to check and, where desirable, to revise estimates in relevant sections. The figures shown for *Manufacturing* have been revised from July 1965 in accordance with the results of the factory census of 1965–66.

The estimated monthly figures are derived mainly from reports supplied by employers on an enterprise or establishment basis. The benchmark figures are derived from personal particulars supplied by individual respondents on population census schedules. However, the industry dissections of census information have been adjusted, as nearly as may be, to an ' enterprise/establishment ' reporting basis. The industry classification used is that of the Population Census of June 1961.

The estimates relate to wage and salary earners on pay-rolls or *in employment* in the latter part of each month, as distinct from numbers of employees *actually working* on a specific date. Some persons working part-time are included.

Employees in rural industry and in private domestic service are not included in the estimates because the available data are inadequate.

Employees of government and semi-government authorities are included in the figures shown in Tables 20 and 21. Estimates of the numbers employed by Commonwealth, State, and local government authorities are available separately and are published in Table 22.

All estimates have been rounded to thousands (correct to the first place of decimals) without adjustment to totals. For this reason, figures do not in all cases add to the totals shown.

The estimates of employment in Tables 20, 21 and 22 are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. A new series of estimates for June 1966 and subsequent months will be published as soon as possible. This series will be based on 1966 Census benchmarks and will be at a higher level than the present series. In due course the estimates for periods prior to the Census of June 1966 will be revised, but on a basis comparable with that of the 1961 Census benchmarks, the information needed to revise these benchmarks on the 1966 Census basis not being available.

## BUILDING STATISTICS

Tables in this section show details of building operations in Western Australia. Statistics for each series *ab initio* appeared in Part XII of the *Statistical Register of Western Australia* for 1965–66. For additional information concerning building activity in Western Australia and for comprehensive data relating to other States and Territories and Australia as a whole, reference should be made to *Building and Construction*, 1965–66 : *Bulletin No.* 2, published 1968 by the Commonwealth Statistician, Canberra.

The Commonwealth Bureau of Census and Statistics, Canberra publishes current building statistics in the monthly statement *Building Approvals* and the *Quarterly Bulletin of Building Statistics* and, in summary form, in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics* and the monthly *Digest of Current Economic Statistics*. The Western Australian Office of the Bureau publishes similar information for Western Australia in the monthly release *Building Permits and Approvals*, the quarterly statement *Building Operations*, the *Monthly Statistical Summary* and the *Quarterly Statistical Abstract*.

## SCOPE OF THE STATISTICS

The survey of building operations, which is conducted quarterly, covers the activities of building contractors who undertake the construction of new buildings ; the building operations of Commonwealth, State, semi-government and local government authorities ; and work performed by ' owner-builders ' (see definition *Owner-built* below). Minor alterations and/or additions, private outbuildings (garages, carports, etc.), repairs and renovations, and temporary buildings are excluded.

In general, building operations may be undertaken only after the issue of a permit by the local government authority concerned. There are, however, areas in some Shires where this condition does not apply. In these ' non-permit ' areas the activities of owner-builders are generally not recorded, and some contract building operations may also be excluded. While it is possible that such omissions may have some significance in a particular local government area, it is considered that, in most cases, they do not materially affect the statistics.

## EXPLANATORY NOTES AND DEFINITIONS

**Building Permits and Approvals**—Statistics of building permits and approvals are compiled from :

(*a*) building permits issued by local government authorities to private persons and firms for operations in areas subject to building control by these authorities, and

(*b*) information from a number of sources on contracts let, work commenced or work authorised by government, semi-government and local government authorities.

**Private or Government Ownership**—A building is classified as ' private ' or ' government ' according to ownership at date of commencement. Thus ' government ' includes buildings erected for Commonwealth and State Governments, semi-government and local government authorities, either by contractors or by day labour, whether these buildings are for their own use or for rental or sale after completion. Houses erected *for particular persons* under government-sponsored building schemes or with government financial assistance are classified as ' private '.

**Alterations and Additions**—Prior to 1 July 1966, additions valued at $10,000 or more to buildings other than houses were classified as ' new ' buildings. From 1 July 1966, alterations and/or additions valued at $10,000 or more to existing buildings of all types have been included as ' new ' buildings.

**Houses and Flats**—The numbers shown relate to individual houses and flats constructed as separate living units. Temporary dwellings, sheds, huts, etc. are excluded. Figures for flats include ' home units '. They do not include flat dwelling units which result from the conversion of existing buildings into flats. Dwellings attached to other new buildings are not included in the *numbers* shown, but their *value* is included with that of the buildings to which they are attached.

**Commenced**—A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform. A building is reported *once only* as having been commenced, whether or not work has actually proceeded at all times during its construction.

**Completed**—A building is regarded as having been completed when the building contractor has fulfilled the terms of the contract or, in the case of owner-built houses, when the house is either completed, or substantially completed and occupied. The value shown is that of the house as a finished project. As with commencements, the classifications made by informants may not be entirely uniform.

**Under Construction**—A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding. Buildings on which work has been permanently abandoned are excluded.

**Owner-built**—An owner-built house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor responsible for the whole job.

**Contract-built**—Includes the operations of all building contractors and government authorities who undertake the erection of new buildings.

**Values**—Values shown exclude the value of land and represent the estimated value of buildings on completion.

**Value of Work Done**—The values shown in Table 44 represent the estimated value of work actually carried out on buildings during each year. For any building, the sum of these values obtained during its construction equals the value of the building on completion. Data relating to the value of work done on owner-built houses (see definition *Owner-built* above) are not collected. However, the figures shown for the value of work done include a component relating to owner-built houses, calculated on the basis of the figures collected for the value of such houses, commenced, completed, and under construction.

**Type of Building**—A building is classified according to the function which it is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the major function of the group as a whole. Examples of the types of individual buildings included under each main functional heading are shown below.

*Hotels, hostels, etc.* includes motels, boarding houses and guest-houses.

*Shops* includes cafes, restaurants, retail markets and showrooms.

*Factories* includes abattoirs, bakeries, gas works, power houses, printing offices and government workshops.

*Office premises* includes banks, insurance offices, government offices, municipal chambers and post offices.

*Other business premises* includes railway station buildings, bus depots, service stations, telephone exchanges, broadcasting and television stations and studios, and warehouses.

*Education* includes schools, colleges, kindergartens, reference libraries and university buildings.

*Religion* includes churches, church halls, convents, seminaries and theological colleges.

*Health* includes ambulance stations, infant health centres, convalescent homes, hospitals, nurses' quarters and sanatoria.

*Entertainment and recreation* includes clubs, grand stands, public halls, squash courts and theatres.

*Miscellaneous* includes museums, art galleries, homes for the aged, benevolent homes, orphanages, defence buildings, law courts, police stations and reformatories.

**Persons Working on Buildings**—The figures appearing in Table 45 relate to persons working on the jobs of contractors who undertake the erection of new buildings and of government authorities which erect new buildings on their own account. They include persons actually engaged on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities.

The figures shown for employment as at 30 June 1961 and earlier exclude persons engaged on buildings, other than houses, which were being erected without the services of a contractor responsible for the whole job. The figures shown for 1962 and later include such persons. Figures for all years exclude those working on owner-built houses. Employees of builders who undertake only alterations, additions, repairs and maintenance are also excluded.

Informants are asked to give details of all persons working on their jobs *on a specified day*, including working principals, men working as or for sub-contractors, and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for informants to provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some understatement in the figures shown. In other cases, because of frequent movement between jobs of some types of tradesmen, such as electricians, who may work on several jobs on the one day, some duplication may occur.

**Local Government Areas**—Local government areas in Western Australia are designated Cities, Towns and Shires. In all tables where a dissection according to local government area appears, Cities are marked (C) and Towns (T). The names and designations shown in the tables are those which were current at 30 June 1967.

Particulars of the numbers of houses completed in individual local government areas are available from 1947–48. A table showing completions in each year from 1947–48 to 1954–55 appears on pages 35–7 of Part XII of the *Statistical Register of Western Australia* for 1954–55. Completions in later years are shown in the corresponding table in succeeding issues.

Statistics of flats completed in local government areas are available from 1954–55 and are given in Tables 35 and 36 of the previous issue of this publication for each year up to 1965–66. Current statistics of completions appear in Table 40 of this issue of Part XII.

(*a*) The State Housing Commission was constituted in January 1947 to replace the former Workers' Homes Board. Completions shown for periods prior to that date represent operations of the Board. (*b*) Comprises houses and individual flat-units. (*c*) Homes built at Kwinana New Town under the provisions of the Oil Refinery Industry (Anglo-Iranian Oil Company Limited) Act of 1952. (*d*) The figures shown represent housing units built by charitable organisations in connection with which the Commission provided design and supervisory services. (*e*) Comprises 221 units completed under the Government Employees' Housing Scheme, 74 units under the provisions of the *Laporte Industrial Factory Agreement Act, 1961-1965*, 55 units in terms of the *Broken Hill Proprietary Company's Integrated Steel Works Agreement Act, 1960*, 128 units for the Exmouth Development Scheme and 2 units for a special Project Development Agreement Scheme. * Revised.

## SUMMARY OF DWELLINGS : CENSUSES, 1961 AND 1966

### EXPLANATORY NOTES

*The figures in Tables 47–52 exclude particulars of dwellings occupied solely by full-blood Aborigines. Such dwellings were excluded from the Census tabulations in accordance with the requirements of section* 127 *(now repealed) of the Australian Constitution.*

---

**Occupied Dwelling.** For the purpose of the Census of Population and Housing an occupied dwelling is any habitation occupied by a household group living together as a domestic unit, and may comprise the whole of a building or only part of it. The term has therefore a very wide reference and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution.

**Unoccupied Dwellings** include vacant dwellings available for sale or renting ; dwellings such as week-enders or holiday homes and seasonal workers' quarters which were not occupied on Census night ; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census ; newly-completed dwellings whose owners or tenants had not entered into occupation on Census night ; and dwellings described as ' to be demolished ', ' condemned ', ' exhibition home ', etc. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

**Private Dwellings** comprise the following classes :

**Private house,** which includes semi-detached houses ; terrace houses ; and shared private houses for which only one Householder's Schedule was received.

**Share of private house.** A share of a private house is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was furnished.

**Self-contained flat.** A self-contained flat is part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities. Home units are included in this class.

**Share of self-contained flat** is that portion of a shared self-contained flat for which a separate Householder's Schedule was furnished.

**Shed, hut, tent, etc.** includes sheds, huts, tents, garages, caravans and boats, which are used for dwelling purposes.

**Other private dwellings** include flats (not self-contained) and dwellings such as rooms, apartments, etc. which are parts of buildings but are not self-contained units.

**Non-private Dwellings** include hotels ; motels ; boarding houses, lodging houses and hostels ; educational, religious and charitable institutions ; hospitals ; defence and penal establishments ; police and fire stations ; clubs ; staff barracks and quarters.

**Local Government Areas.** In Western Australia local government areas are designated Cities, Towns or Shires. In Table 47, Cities are marked (C) and Towns (T), all other local government areas being Shires. *The names and designations used are those which were current at* 30 *June* 1966. Between the Censuses, some new Shires were constituted, some local government areas were amalgamated, and there were some changes of name and of designation. These are listed below.

(i) The Town of North Fremantle was annexed to the City of Fremantle with effect from 1 November 1961.

(ii) Mosman Park, formerly a Shire, was declared to be a Town with effect from 26 January 1962.

(iii) The Shire of Coorow was constituted, with effect from 1 July 1962, by severance of territory from the Shires of Carnamah, Dalwallinu and Perenjori.

(vi) Melville, formerly a Shire, was declared to be a Town with effect from 28 September 1962.

(v) The Shire of Exmouth was constituted, with effect from 1 January 1964, by severance of territory from the Shire of Gascoyne-Minilya.

(vi) The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from 1 March 1965.

(vii) The Town of York was amalgamated with the Shire of York, with effect from 15 March 1965, to form one local government area named the Shire of York.

(viii) The name of the Shire of Geraldton-Greenough was changed to the Shire of Greenough, with effect from 19 March 1965.

(ix) The name of the Shire of Trayning-Kununoppin-Yelbeni was changed to the Shire of Trayning, with effect from 10 September 1965.

The particulars shown in Table 47 for 30 June 1961 in respect of all local government areas mentioned in (i), (iii), (v), (vi), and (vii) above relate to the 1966 boundaries and have been derived, where necessary, from an examination of the 1961 Census schedules.

In addition, there were some other boundary changes which resulted in a change in the numbers of dwellings in particular local government areas. In these cases the 1961 dwellings data have been similarly adjusted to the 1966 boundaries.

## RETAIL SALES STATISTICS

In the tables in this section, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainment, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards.

The data given in Tables 56–61 for the years 1956–57 and 1961–62 were obtained from Censuses taken in respect of those years, and have been abstracted from *Census of Retail Establishments and Other Services : Year ended* 30 *June* 1962 ; *Bulletin No.* 6—*Western Australia*, published by the Commonwealth Statistician. For complete details of the tabulations and a comprehensive description of Census concepts and procedures, the reader is referred to this Bulletin, which is one of a series dealing separately with each of the Australian States and Territories. The information appearing in Table 55 is extracted from a quarterly statistical statement *Retail Sales of Goods* which is issued by the Commonwealth Statistician and contains similar information for each of the Australian States. The figures are estimates derived from a sample survey of retail establishments conducted each quarter by the Commonwealth Bureau of Census and Statistics and are on a basis comparable with the 1961–62 Census of Retail Establishments.

### Scope of Retail Census

In general, establishments with retail sales of goods amounting to less than $1,000 in the Census year are not included in the Census tabulations.

In addition to retail shops, as generally understood, the Census *includes* the retail activities of the following :

Licensed hotels, motels, wine saloons and refreshment rooms ; unlicensed hotels and motels which have dining rooms open to the public
Bakeries, whether sales are made from retail premises or from a vehicle (provided that sales from vehicles are made on the baker's own behalf)
Tailors (except tailors who only make up customers' materials)
Garages and service stations, motor vehicle retailers, used-car lots
Gas and electricity suppliers (in respect only of their retail sales of appliances)
Fuel and ice merchants with retail premises

The following establishments are *excluded*, unless they make sales by retail to the general public from fixed premises :

Opticians and optometrists
Laundries and dry cleaners (included in a supplementary collection)
Theatres (motion picture theatres were included in a supplementary collection)
Timber yards and joinery works
Brick works
Roofing tile works
Establishments providing trade services such as carpentry, electrical contracting, plumbing, upholstery, panelbeating and motor body building, monumental masonry, etc.
Real estate agencies, stock and station agencies
Newspaper publishers and printers
Photographic studios
Dressmakers
Establishments catering for special occasions (races, sports meetings, etc.)
Herbalists
Lending libraries

Market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, which sell direct (either on site or from delivery vehicles) and which do not conduct a shop or regular roadside stall, also are *excluded*.

Organisations such as clubs and societies making sales to their own members are excluded from the main Census collection, but a supplementary collection was made, covering sales by *licensed* clubs.

The design of the Census is such that particulars of retail sales relate principally to sales, to the final consumer, of new and second-hand goods generally used for household and personal purposes. For this reason, sales of building materials ; farm and industrial machinery and equipment ; earth-moving equipment, etc. have been excluded from the Census. For the same reason, and also because of difficulties in obtaining reliable and complete reporting, sales of builders' hardware and supplies ; business machines and equipment ; grain, feed, fertilisers and agricultural supplies ; and tractors were excluded from the 1961–62 Census. The 1956–57 Census particulars as published in Tables 57–59 have been revised to exclude sales of these commodities. At both Censuses, retail sales of motor vehicles, parts, etc. were included whether for industrial, commercial, farm or private use.

Where sales of goods other than new motor vehicles are made on commission, the basis of collection is for sales to be included in the principal's returns and not in those of the agents. In the 1956–57 Census, this practice was also adopted for sales of new motor vehicles. However, in that Census difficulties were experienced in ensuring that some sales of new motor vehicles were not reported twice (*i.e.* by both the principal and the agent). Another effect of the 1956–57 procedure was that sales of new motor vehicles made on a commission basis through country agents were generally shown in statistics for the Metropolitan Statistical Division, where the businesses of the principals are mainly located, and this tended to present an unrealistic pattern of the area distribution of total new motor vehicles sales. Because of these factors, it was decided that, for the 1961–62 Census, sales of new motor vehicles should be included on the return of the establishment which made the sale to the final consumer, irrespective of whether the sales were made by a commission agent or by a principal. It has not been practicable to revise the 1956–57 figures to take account of the changed collection arrangements.

There are certain types of establishments (*e.g.* licensed clubs and canteens) which, although they make sales to consumers, are excluded, by definition, from the Census. For this reason, the aggregates shown for some commodity groups are less than the total value of goods in those groups actually sold to consumers. This applies in particular to tobacco, cigars, cigarettes, beer, wines and spirits. Sales of cigarettes are made also by means of vending machines operated by independent organisations.

### Type of Business

All establishments were classified according to Type of Business. For the purposes of such classification, reference was made to the type of goods sold or service rendered as indicated by the commodity sales and other takings recorded on the Census returns. In general, establishments were coded to the Type of Business which corresponded to their predominant ' type ' of goods sold or service rendered (*i.e.* the ' type ' with the largest sales or takings).

The basis of coding establishments to Type of Business was broadly the same in the two Censuses. However, there are some establishments whose returns in the two Censuses showed relatively small differences in the distribution of sales between commodity groups, and which are coded to different Types of Business in the respective Censuses. For example, an establishment whose 1956–57 Census return indicated that Electrical Goods was the predominant ' type ' of goods sold, with Clothing and Drapery as the ' type ' with the next largest sales would have been coded as an Electrical Goods Store in the 1956–57 Census. If a slight change occurred between the two Censuses, with the result that the same establishment's 1961–62 Census return indicated that Clothing and Drapery was the predominant ' type ' of goods sold, the establishment would be coded as Clothier and Draper in the 1961–62 Census (unless the establishment satisfied the definition for Department Store).

In the 1961–62 Census, a separate Type of Business classification was provided for Department Stores. In the 1956–57 Census, such establishments were originally coded to the type of business appropriate to the distribution of sales by commodity groups. However, the 1956–57 figures have been revised to a basis consistent with that used in 1961–62, and consequently comparisons are not affected.

### Statistical Retail Areas

In general, Statistical Retail Areas comprise groups of contiguous local government areas (*i.e.* Cities, Towns and Shires). For the 1956–57 Census the local government area boundaries were those existing as at 1 January 1957 and for the 1961–62 Census, as at 1 January 1962. Although some boundary changes took place between these dates they were such as not to invalidate intercensal comparisons of data relating to Statistical Retail Areas or Statistical Divisions.

Names of local government areas included in each Statistical Retail Area and Statistical Division are shown in Table 59.

### Persons Working on Retail Activities

Traders were asked to supply details of the number of persons working at the establishment on the last pay-day in June 1962. The figures include persons normally working at the establishment who were absent on account of sickness or were on holiday. Traders were asked to provide separate details of persons working mainly on retail activities and others working mainly on wholesaling, manufacturing, etc. For this purpose, retail activities were to include retail selling (including bar trade), repair work, hairdressing, preparation and serving of meals, accommodation, retail packing and delivery services, retail supervisory, clerical and accounts staff, etc. Only details of persons working mainly on retail activities are shown in Table 61. In the case of chain stores and other organisations operating several retail establishments, special inquiries were made to obtain details of persons working on activities associated with retail selling but located at premises other than retail establishments (*e.g.* central warehouses, offices not located at retail establishments, etc.). These details have been included in the return for the largest retail establishment operated by each organisation.

(a) Estimated mean population exclusive of full-blood Aborigines. (b) Figures are on a revised basis. See notes on pages 60–1. (c) Revised in accordance with final results of the 1966 Census. (d) Excludes basic building materials, builders' hardware and supplies (*e.g.* tools of trade, paint, etc.). (e) Not applicable. See also footnote (g). (f) Excludes tractors, farm machinery and implements, earth-moving equipment, etc. (g) Total number of individual establishments. Many establishments showed sales in more than one group. Thus the number of establishments selling goods in each commodity group does not add to the total number of individual establishments.

## AUSTRALIAN CONSUMPTION OF FOODSTUFFS AND BEVERAGES

Estimates of the quantities of foodstuffs and beverages entering into consumption in Australia are prepared annually by the Commonwealth Statistician. Separate details are not available for Western Australia. The figures in the following table have been taken from the *Official Year Book of the Commonwealth of Australia :* No. 53, 1967. More detailed information on the consumption of foodstuffs and beverages is contained in the statistical bulletin, *Report on Food Production and the Apparent Consumption of Foodstuffs and Nutrients in Australia*, published annually by the Commonwealth Statistician.

The estimates shown in the following table have been compiled by deducting net exports from the sum of production and imports and allowing for recorded movements in stocks of the respective commodities. While the estimates may be generally accepted as being reasonably accurate, there are some deficiencies to which attention should be directed. These relate chiefly to the quantities of poultry, fish, rabbits and hares and the quantities of certain oils and fats entering consumption. In addition, little information is available on the quantities of vegetables, fruit, eggs, etc. which householders produce for their own requirements, and the extent of wastage occurring in the marketing of foodstuffs. In all these cases careful estimates have been compiled from the best available data, and the quantities shown as entering consumption in Australia have been adjusted to allow for these circumstances. The absence of particulars for stocks of certain commodities has resulted in some inaccuracies in the estimates of annual consumption. Consumption of foodstuffs is measured in general at ‘ producer ’ level. As a result, no allowance is made for wastage before the foodstuffs are consumed. In recent years wastage of foodstuffs has possibly been less than previously because of more efficient distribution and storage methods. Furthermore, it is likely that the quantities of foodstuffs shown as available for consumption have been supplemented by production by householders for their own requirements. In most cases broad estimates of non-commercial (householders') production have been made. Except in a few special cases, no adjustment has been made for changes in stocks held by wholesalers and retailers. Where no allowance is made it is considered unlikely that these stocks would make any appreciable difference to consumption estimates. It is felt that the foregoing deficiencies do not seriously impair the accuracy of the estimates compiled.

The effect of changes in the composition of the population should be borne in mind when comparing estimates of consumption per head of population over a number of years. There have been two significant changes since 1945 which have almost certainly had some effect on the consumption pattern. These are the changing age distribution of the population, and the increasing proportion of the population born overseas.

For some foodstuffs, data relating to consumption per head should be viewed in their correct perspective. For example, while consumption per head of infants' and invalids' foods has been calculated on the basis of the mean population for the years concerned, these commodities are clearly consumed by a relatively small proportion of that population. The actual consumption per head by infants and invalids would therefore be considerably higher than the figures shown.

Particulars for the period 1963–64 to 1965–66 are subject to revision.

## NOTES

**Rounding of Figures**—Many of the figures appearing in the tables have been rounded to thousands without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

**Population and Vital Statistics**—Before an amendment to the Australian Constitution in 1967, it was provided by section 127 that " in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted". This provision was deleted by the Constitution Alteration (Aboriginals) Act of 1967, following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The Act became operative on 10 August 1967.

With regard to the original provision, Commonwealth legal authorities were of the opinion that persons of the half-blood were not " aboriginal natives " within the meaning of the Constitution, and *a fortiori* that persons of less than half aboriginal blood were not aboriginal natives. Accordingly, only persons having aboriginal blood to a degree greater than one-half were excluded from the main tabulations of the Population Censuses, and from population and vital statistics. Therefore, the term " full-blood Aborigines ", as used in relation to these statistics, is to be understood to mean persons with more than one-half aboriginal blood.

As a result of the amendment to the Constitution, current population estimates and vital statistics no longer exclude full-blood Aborigines. In the table on page 4, population estimates for the period since the Census of 30 June 1961 include all Aborigines and supersede those published in earlier issues. Vital statistics, which until 31 December 1966 excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population.

**Employment Estimates**—The employment estimates shown on page 21 of this publication are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. A new series of estimates for June 1966 and subsequent months will be published as soon as possible. This new series will be based on 1966 Census benchmarks and will be at a higher level than the present series. In due course the estimates for periods prior to the Census of June 1966 will be revised, but on a basis comparable with that of the 1961 Census benchmarks, the information needed to revise these benchmarks on the 1966 Census basis not being available.

(*a*) From 1915, year ended 30 June. (*b*) Excluding plywood and veneers and small quantities of timber for which no super. footage is recorded. For the years 1906 to 1921, figures are approximate. (*c*) Figures for the years 1949–50 to 1951–52 represent overseas exports only and exclude small consignments to other Australian States. Those for 1952–53 to 1959–60 include small consignments of cooked whole crayfish to other Australian States. (*d*) A major oil refinery began production in 1954–55. In some earlier years there were small consignments of re-exported products which were of little significance and are not shown. (*e*) Less than $500. (*f*) Six months ended 30 June. (*g*) Precise information not available, but it is known that the value of exports was about $500,000. (*h*) Not available. * Revised.

(a) From 1906, at 30 June ; for earlier years, at 31 December. (b) Comprises allocations by Lands Department and certain leases and licences issued by Mines and Forests Departments. Apparent decrease in 1951 due mainly to revisions in records of Lands Department. (c) At 31 December for 1941 and earlier years ; from 1942, the figures shown relate to 31 March in the following year. (d) Comprises shorn, dead and fellmongered wool. Excludes wool exported on skins. For 1947 and earlier, year ended 31 December ; figures shown for 1948 to 1964 are for the year ended 31 March in the following year. From 1965 figures relate to the year ended 30 June in the following year. (e) Figures for 1949 and 1951 to 1955 exclude distributions of profits under the 1939–1945 War-time Wool Disposals Plan aggregating $13,869,934. Separate State figures are not available for distributions made from 1956 to 1958 when payments were virtually complete. (f) Less than 500. (g) Not available. (h) Preliminary; subject to revision. (i) Not available at time of publication.

(*a*) See footnote (*a*) on preceding page. (*b*) Comprises gold refined at the Mint and gold contained in gold-bearing materials exported. (*c*) Australian currency value including amounts, totalling $2,946,765 for the years 1952 to 1967, distributed by the Gold Producers' Association Ltd. from premiums on sales of Western Australian gold. Also includes net subsidy payments by the Commonwealth Government, under the *Gold Mining Industry Assistance Act* 1954–1966, totalling $20,029,278 in the years 1955 to 1967. (*d*) From 1915 figures relate to year ended 30 June. (*e*) Prior to 1940 averages generally are based on exports of the previous season's wheat; from 1940 they relate to exports during the year ended 30 June. (*f*) Not available. (*g*) Exports negligible; average Metropolitan Market price shown. (*h*) For six months ended 30 June. (*i*) Not available at time of publication.

(*a*) Figures generally are for the season or financial period ending in the following year. (*b*) Represents the estimated value of recorded production based on wholesale prices realised at the principal market. (*c*) In addition, the following amounts were paid as interim distribution of profits under the 1939–1945 War-time Wool Disposals Plan : in 1949, $3,629,478 ; in 1951, $3,629,478 ; in 1952, $2,325,324 ; in 1953, $368,104 ; in 1954, $2,120,460 ; and in 1955, $1,797,090. Separate State figures are not available for distributions made from 1956 to 1958 when payments were virtually complete. (*d*) For primary production, net value of production is derived by deducting from the gross value all marketing costs and the cost of certain goods (seed, fertiliser, pickling, sprays, dips, fodder, fuel and oil, etc.) used in the processes of production. For manufacturing, net value of production is the value added in the course of manufacture. It is obtained by deducting from the selling value "at the factory" the cost of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and materials used for packing. (*e*) Not available. (*f*) Eighteen months ended 30 June 1926. (*g*) See footnote (*f*).

(*a*) For statistical purposes a factory is defined as any establishment engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year, or power other than manual is used. (*b*) For 1924 and earlier, calendar year; from 1927, year ended 30 June. See also note (*m*). (*c*) Average over the whole year and includes working proprietors and, up to and including 1925–26, fallers and haulers employed by sawmills. (*d*) Figures for 1929–30 and later years exclude amounts drawn by working proprietors. (*e*) Selling value "At Factory Door". (*f*) Value added in course of manufacture, representing sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit. (*g*) For years prior to 1964–65, figures include all types of standard size bricks. Prior to 1925–26, they also include firebricks and blocks. From 1964–65 figures represent clay bricks only (all sizes). (*h*) Prior to 1948–49, figures exclude quantities produced and used in own works. From 1948–49 figures include such quantities. (*i*) Includes plywood veneers in terms of super. feet and hewn timber produced by agencies other than "Factories". (*j*) For 1917 and earlier years, includes butter made on farms. (*k*) Short ton = 2,000 lb. (*l*) Not available. (*m*) Eighteen months ended 30 June. * Revised.

(*a*) See *Special Note* below. (*b*) In the period from December 1950 to June 1967 the female basic wage was fixed at 75 per cent of the male rate ; previously it had ranged from 54 per cent up to 75 per cent of the male rate. (*c*) The rates shown for 1964 and later apply uniformly throughout the State. (*d*) The first State basic wage operated from 1 July 1926.

*Special Note*—The latest wage rates shown in the " State " section of this table are those which applied before a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from $36.55 to $37.55 ; "that the wage rates for adult workers not in receipt of the ' minimum wage ' be increased by 60 cents per week ; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount". These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. The latest wage rates shown in the " Commonwealth " section of the table applied before a decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were increased by $1 a week from the same date.
